Particulars About Ordering

Order Early. All orders should be sent in as early as possible. It is our rule to fill orders as nearly as we can in rotation as received. Order early and make sure of receiving your stock in good season, and if you desire shipment made on any certain date mark it plainly on your order.

Discount for Early Orders

On all CASH ORDERS for stock selected at regular catalogue prices, received before March 15th, we will allow a discount of 5% in trade, thus enabling you to select \$1.00 worth of stock for 95 cents. On orders received between March 15th and April 1st we will allow 3% discount. No discount allowed on Special Bargain Collections.

FREE PREMIUMS

With all NET CASH ORDERS amounting to \$5.00 to \$10.00 we will send FREE 1 New Rochester Peach Tree.

With NET CASH ORDERS amounting to \$10.00 to \$15.00 we will send FREE 1 New Rochester and 1 New Hale Peach Tree.

With orders amounting to \$15.00 to \$20.00 we will send FREE 1 New Rochester, 1 New Hale Peach Tree and 6 St. Regis Raspberry Plants.

Orders for \$20.00 and over we will include FREE PREMIUMS of 1 New Rochester Peach, 1 New Hale Peach, 6 St. Regis Raspberry Plants, 3 Red Cross Currants and 3 Strawberry Rhubarb Plants.

All stock in FREE PREMIUMS will be strictly first class in every way.

How to Order and How to Remit. All orders should be written out on the order sheet herein. Write plainly and be sure to give Name, Address, Railroad and Express Company. Payment should be made either by P. O. Money Order, Express Order, Check, Bank Drafts or Registered Letter. Terms are Net Cash with order, except where otherwise arranged by mutual agreement.

Boxing and Packing. We make no charge for boxing or packing. All goods delivered free to freight and express companies. All stock is carefully packed, sure to reach customer in best condition and we guarantee safe delivery.

Sandy Point, Maine, May 20th, 1914.

Trees arrived in good condition after being on the road 24 days, due to being properly packed by people who knew how.

E. A. PARTRIDGE.

Shipping. Tell us just how and where you want goods shipped. Small orders should always be sent by express, and with the reduced express rates now in force will cost no more by express than by freight.

Shipping Seasons. Our Spring shipping season opens the latter part of March and continues along in May. In the Fall we start shipping about October 10th and continue to about December 1st.

We Prepay Freight Charges. See table on Page 7.

GUARANTEE. We use the greatest precaution to have everything we send out true to name, but if through any fault of ours any stock proves not true to label, we will on proper proof, replace double the number of trees or plants not true, or we will refund purchase price, plus 6 per cent compound interest and also replace stock.

L. W. HALL COMPANY, Inc. :: :: ROCHESTER, N. Y.

"WHERE QUALITY DOMINATES"

Buy Rochester Grown "Hall's Quality" Fresh Dug Nursery Stock

N PRESENTING our latest **Catalogue** we offer you the best of the old kinds as well as many new varieties of merit. We have described our stock fully and honestly, give no exaggerated or misleading descriptions, and do not promise more than we can fulfill.

Our business is that of **growing and selling trees and plants**, and it is our aim to produce stock of superior quality and vitality. We do not claim to undersell all competitors, but endeavor to **excell in size, grade and quality**. We sell only good goods and ship no stock we would not plant ourselves.

LOCATION. Rochester is known as the largest nursery center in the world. Located at the lower end of the famous Genesee Valley, near the shores of Lake Ontario, we have a wide range of temperature and soil especially adapted for growing clean, hardy, strong, vigorous trees and plants, superior to those from any other locality.

WE GROW OUR OWN STOCK and everything is **Fresh Dug** in the Spring; we have no cold storage. Mr. Hall, Senior, has been growing high grade nursery stock here at Rochester, N. Y., for the past 40 years; he is expert in all branches of the business; all growing is done under his direct supervision, and he personally cuts all the buds for budding the different varieties. We know the stock we offer is grown right and is right, and in buying from us you take no risk; you buy stock backed by the guarantee of responsible and reliable growers who have been raising trees and plants of highest grade and quality for 40 years.

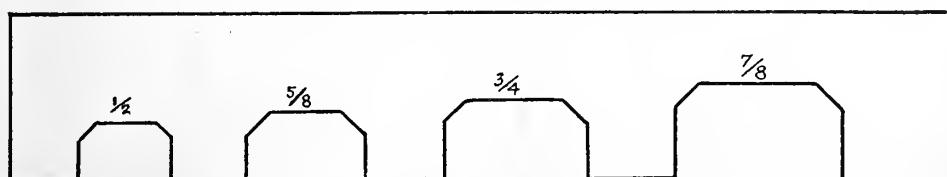

WE SELL DIRECT TO THE PLANTER and depend on the merits of our stock to hold and ex-

tend our trade. Our customers come back to us year after year and many new customers come to us each season because of the good things they hear about our stock from others. We have pleased and satisfied our old customers and assure those who place their first order with us this year that we will endeavor to give them equally good service.

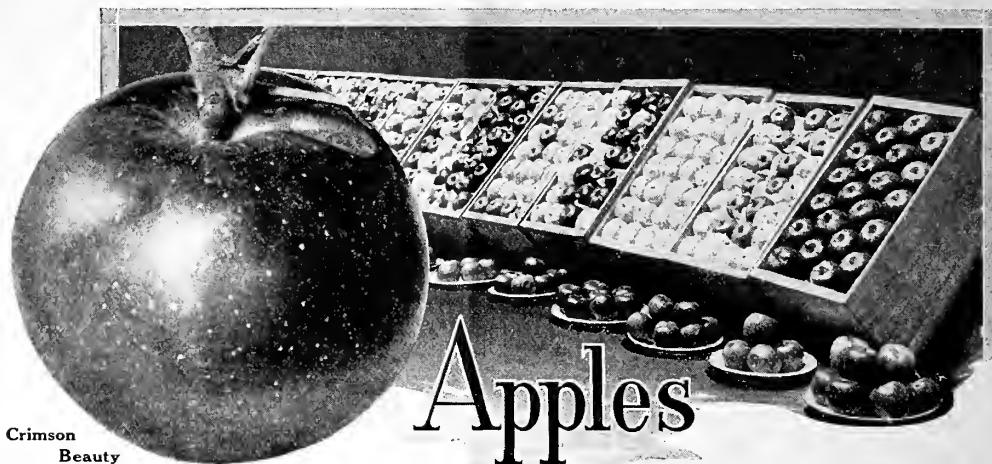

WE GUARANTEE to deliver trees and plants of highest grade and quality—healthy, hardy, thrifty, free from San Jose Scale or disease of any kind.

PRICES. Price is important, of course, but **Quality Should Always Be Considered First**. Men able to look ahead see that in buying trees and plants the **Best is the Cheapest** in the long run. The difference in cost is trifling as compared with the difference between a healthy, vigorous and profitable orchard and a worthless block of orchard trees; between success and failure. Trees of superior merit, such as we offer, should certainly command prices above stock of cheap or ordinary quality. Pay us a fair price for our high class goods, backed by our guarantee of quality, and get the best.

GRADING AND SIZE OF TREES. Among wholesale nurserymen there is a standard of caliper and height for each grade of stock, and it is the caliper or diameter of the tree, rather than the height alone, that governs the price. Many nurserymen selling through catalogue mention height only and consequently can put into their largest grade many trees that would actually go into the next smaller grade if all stock was calipered according to the recognized standard. We grade all stock according to caliper as well as height, as noted in our quotations. Remember, **it is the caliper that counts** and be sure you are comparing trees of same caliper as well as of same height when you compare our prices with others.

It's the "Caliper" that counts.

Crimson
Beauty

Apples

NO FRUIT can take the place of the Apple as a food product. It has long been known as "our national fruit." It leads them all in amount and value, and beyond question the Apple is now coming into its own. The territory where Apples can be grown is almost unlimited and there are more opportunities to-day than ever before in the world's history for a splendid profit.

In many parts of the U. S. up to a very few years ago apples have been more or less of a luxury. To-day by placing good apples within the reach of these people you have a demand and a market for apples where none existed before, and improvement in marketing conditions is sure to make commercial orcharding more profitable than ever.

The Apple Orchard is recognized as one of the most profitable investments on the farm. The fruit of a single tree will often sell for \$10.00 or more, and fifty such trees can be planted on one acre. By setting standard varieties you are sure of good crops and handsome profits.

If apple trees are planted at the rate of forty or fifty to the acre and rows of peach trees planted between the apple trees each way; the peach trees come into bearing in about three years, and after eight or ten years of productiveness they can be cut

out so as not to interfere with the growth of the apple trees, at the same time having yielded the planter a large return.

Our apple trees are generally three years from root, two years from bud, and are grown on the Imported French Crab Whole Root Seedlings. **TREES ON WHOLE ROOT.** What are they? Many nurserymen call trees grown from the upper cuts of the seedlings about 6 inches long whole root trees, but they are not. We take the entire full length seedlings as we receive them from France and set them out and bud on those, so that our trees are in the strictest sense, Whole Root trees and are superior to ordinary trees grown on pieces of roots cut anywhere from 2 to 6 inches long.

Our method of growing makes the cost of production double that of trees grown on American Seedlings, or grafted on piece roots, and for this reason our prices may be somewhat higher than others are quoting. However, we have found our manner of growing insures the finest root system to the trees, and we believe warrants the extra cost, for it produces the most vigorous, thrifty and hard-wooded trees.

We give below a list of leading varieties, which have been well tested and can be recommended as among the best in cultivation.

Prices of Standard Apples and Crabs, all grown on Best Imported French Whole Root Seedlings: (except where noted)

	Each	10	100	1000
XXX Extra, 5 to 7 ft., $\frac{3}{4}$ inch and up in caliper.....	\$0.25	\$2.00	\$16.00	\$140.00
XX First Class, 5 to 6 ft., $\frac{5}{8}$ to $\frac{3}{4}$ inch caliper.....	.20	1.50	12.00	110.00
X Medium Size, 4 to 5 ft., $\frac{1}{2}$ to $\frac{5}{8}$ inch caliper.....	.15	1.25	10.00	90.00

25 and 50 at 100 rates; 250 and over at 1000 rates.

Note:—Some of the strong growing varieties, such as Baldwin, Greening, Northern Spy, etc., will run 6 to 7 feet in the Extra Large grade, other kinds slower growing average 5 to 7 feet.

Summer Apples

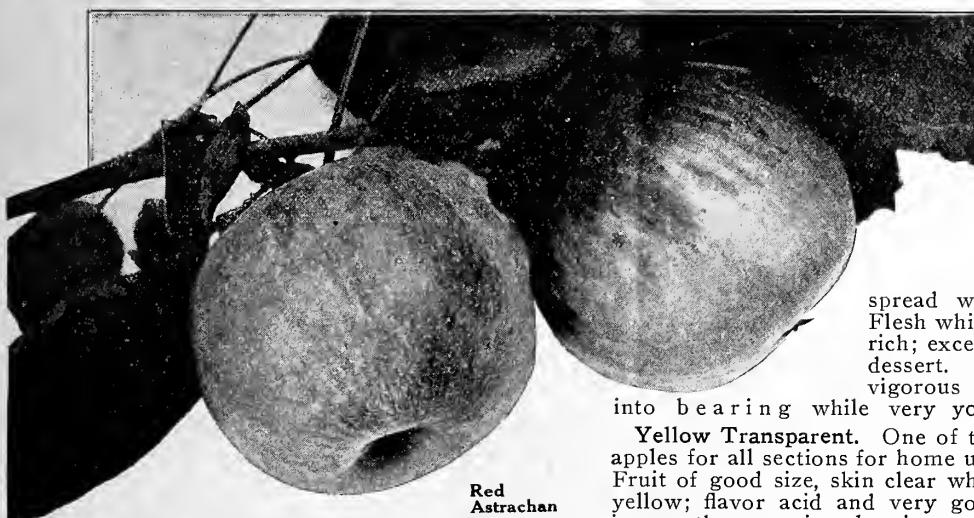

Early Harvest. Medium to large; pale yellow; fine flavor. Tree a moderate, erect grower; a good bearer. A beautiful and excellent variety for garden or home orchard. (Middle to end of August.)

Crimson Beauty. A very attractive looking early red apple. Tree very hardy, strong grower,

very productive. Fruit good size, flesh white, firm, crisp, tender and juicy, sub-acid, pleasant flavor. The best early red apple we know of.

Price of Crimson Beauty

Red Astrachan

Summer Apples—continued

Sweet Bough. One of the finest summer apples; should be found in every good collection for home use. Bears young and abundantly. Fruit large, pale green; flesh fine, very tender, juicy, sweet, with rich flavor. (August.)

Autumn

Duchess of Oldenburg. A popular and profitable late summer apple, one of the best of its season for home or commercial orchard. An extra good shipper; one of the best money-making varieties. A handsome apple of good size, streaked red and yellow; flesh white, juicy, excellent in quality. Tree very hardy and vigorous; a natural dwarf, bears very young and abundantly; one of the best to use as a filler. One of the few varieties that will stand the climate of Iowa, Montana, Michigan, Minnesota, Wisconsin, and other cold sections. Should be planted in every orchard in New York, Pennsylvania, Ohio and all Northern states. Duchess of Oldenburg is one of the most important varieties for all sections both North and South.

Fameuse (Snow Apple). One of our finest dessert fruits. Of medium size, smooth, regular, deep crimson, with snowy white, tender, melting flesh of delightful flavor. The tree is vigorous and hardy, succeeding especially well in the North.

Astrachan, Red. A favorite in all sections for home and local market, where it brings highest prices because it is one of the very first to ripen. Fruit uniform and of good size, deep crimson over-spread with thick bloom. Flesh white, tender, juicy and rich; excellent for cooking or dessert. Tree very hardy, a vigorous grower and comes into bearing while very young. (August.)

Yellow Transparent. One of the best extra early apples for all sections for home use or local markets. Fruit of good size, skin clear white, turning to pale yellow; flavor acid and very good. Tree dwarfish in growth, comes into bearing very young, yields immense crops every year; extremely hardy, and one of the few kinds that stands Canadian Winters as well as Georgia Summers. One of the earliest to ripen, coming in when demand for summer apples is strongest and consequently commands highest prices and is one of the most promising commercial sorts.

Apples

Fall Pippin. Very large; yellow, tender, juicy and rich. Tree vigorous. (October to December.)

Gravenstein. Large; greenish yellow to orange yellow, with stripes of light and dark red; flesh yellowish, firm, moderately fine, crisp, moderately tender, juicy, sub-acid, aromatic; very good to best. (Late September to early November.)

Maiden Blush. Medium to large; pale, waxen yellow with crimson blush; flesh moderately crisp, tender, very juicy, sub-acid. Tree a fine grower, hardy; bears rather young, yielding good to heavy crops. (September to December.)

Rambo. A highly flavored early winter or autumn apple, popular in Delaware, Pennsylvania, New Jersey, Ohio and middle Mississippi Valley section. Fruit medium size, yellow streaked with dull red, tender, juicy and mild, particularly desirable for dessert.

Twenty Ounce. Very large, yellow and red; tender, juicy, crisp, sub-acid; productive. (October to January.)

Jonathan

Northern Spy

Stayman's Winesap

King

Winter Apples

Baldwin. Everyone knows the old reliable Baldwin, the standard variety on every market, the apple from which all others are judged. Baldwin has been the leader for 70 years and is more popular now than ever before. Fruit large, roundish, deep red; flesh crisp and juicy, of fine, rich, sub-acid flavor and delightful aroma. Keeps splendidly well into winter, an excellent shipper. Baldwin is the best all-round winter apple for New York, New England and the Northern states; grown more or less in all sections from Michigan to West Virginia. Tree a quick, strong grower, with good care will bear in six years and after that can be depended on for heavy crops. The markets always pay well for Baldwins; they sell quicker than any other sort and produce every year ten times the money that corn or wheat will yield on the same acreage. Keen, practical fruit men continue to plant Baldwin orchards, knowing they are sure money-makers. (December to March.)

Baxter. Originated in Canada. Fruit uniformly large, handsome showy red, mild acid, fine quality. Tree extremely hardy, vigorous and productive. (Dec. to May.)

Ben Davis. The great market apple of the West and South, largely planted also in the East. One of the best for profit. Very early bearer and yields an immense crop of large, sub-acid, bright red, fine shaped fruit. The apple is of poor quality, but its attractive color, size and shape make it sell. It is a splendid keeper and fine for cooking. (December to April.)

Black Ben Davis. One of the handsomest of all apples, large, deep, dark red, a favorite for fancy fruit-stand trade, where it commands highest prices because of its attractive color and immense size. A splendid keeper and one of the best for long-distance shipping. Tree strong, vigorous grower, hardy and rugged; bears young and produces immense crops every year. Succeeds from coast to coast and in any soil; one of the best commercial sorts for all sections.

The
Well Known
Baldwin
Apple

A Good Keeper
and
Fine Shipper

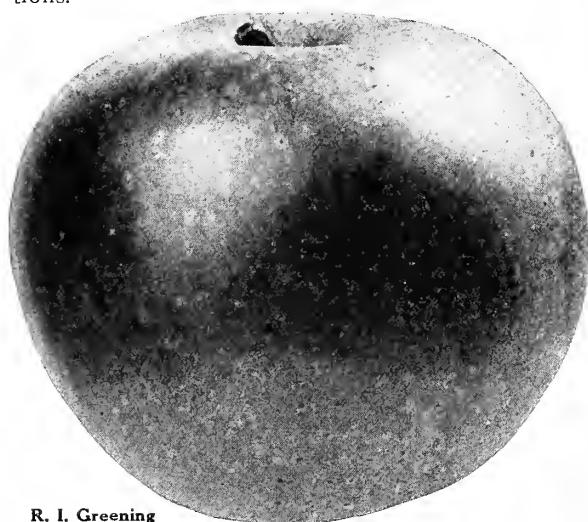

Bismarck. Highly prized for its wonderful productiveness and early bearing; often fruits at two years old. Color deep yellow with red cheek; flesh tender and juicy; excellent for cooking. Season early winter.

Delicious. The sensation of the times in all fruit growing circles; no apple has been more widely talked about, more generally planted, or better received by both consumer and grower. Originated in Madison County, Iowa. Delicious is one of the best early winter apples for all sections; successful wherever apples grow. Tree bears early and abundantly and no apple brings better prices. Fruit of rich, distinctive flavor, quality unsurpassed; tender and melting, mild, very aromatic and pleasant to the taste; truly Delicious. A large, conical shaped apple, beautifully colored and suffused with striped red over yellow ground. A great commercial success; always profitable because of the demand. Start a good sized Delicious Orchard this year and share in the profits to be derived from growing this remarkable new variety. For home use or market, plant Delicious. You will find it one of the finest apples in all the world.

	Price of Delicious—	Each	10	100
XXX		\$0.35	\$3.00	\$25.00
XX25	2.25	20.00

Dudley (North Star). Originated in Maine, a seedling of Duchess of Oldenburg, recommended for Northern New England, the Bayfield District of Wisconsin and other cold sections where an extra hardy apple is wanted. Fruit of good size, attractive in appearance, red or red-striped over contrasting yellow; juicy, aromatic, brisk sub-acid, good quality. Tree very hardy and productive.

Golden Russet. Of medium size, round-ovate; clear golden russet, with slight blush; tender, crisp, juicy and high-flavored. Tree robust and hardy; bearing large crops. (November to April.)

R. I. Greening

Winter Apples—continued

McIntosh Red

Gano. Form conical, good size and smooth; deep red, shaped on sunny side to mahogany; very attractive; flesh pale yellow, fine grained, tender, pleasant, mild, sub-acid; is a good shipper and keeper. Tree healthy, vigorous and hardy. An annual and prolific bearer. February to May.

Grimes Golden. Undoubtedly the most popular golden apple, prized for its beauty and quality. Golden, transparent yellow, tender, rich and delicious; keeps well without losing any of its crispness or flavor. One of the best for fancy box trade; thousands of people buy it in preference to any other apple for dessert purposes. A most profitable commercial variety, one of the best for Pennsylvania and Virginia and extensively planted in all Western and Southern states. Tree very hardy and productive; bears young; a splendid filler.

Hubbardston (Nonesuch). Large, striped yellow and red; tender, juicy and fine. One of the best. Excellent for commercial orchard planting. (November to January.)

Jonathan. A brilliant red apple of high flavor; juicy, fine-grained and tender. A favorite family sort and highly profitable for market. Keeps well; a splendid shipper. Tree long-lived and productive; bears young, and is adapted to many sections, but especially desirable in New York, New Jersey, Pennsylvania, Maryland and all Central Western states. (October and November.)

King of Tompkins County. A superb red apple of extraordinary size and fair quality; the flesh is slightly coarse, but tender and vinous. An abundant annual bearer. (November to March.)

McIntosh Red. A Canadian variety of the Fau-muese class that deserves unstinted praise. Fruit bright red, wondrously beautiful, with tender white flesh of splendid flavor and highest quality; juicy and aromatic, irresistible to those who once taste it. A fine table apple, one of the best for home use; keeps well and is mellow and good till the last. An excellent shipper. Tree most hardy and vigorous; will bear in three to four years, and has heavy crops.

Adapted to a wide range of territory; one of the best for New York, Michigan, Minnesota, Wisconsin and New England states; also extensively planted in the Central West. In West Virginia and the more Southern states it becomes one of the finest fall apples.

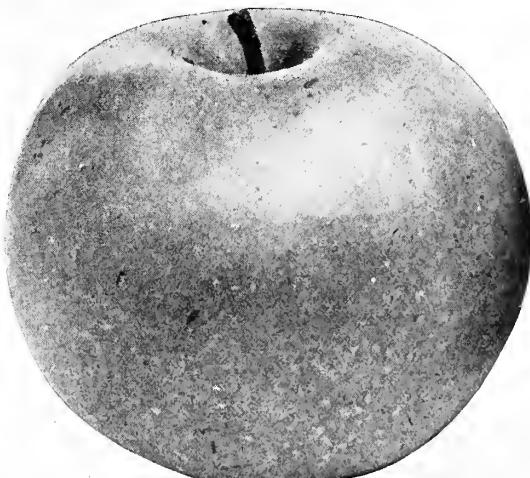

Northern Spy. An old standby from West Virginia north, too well known to need much description. Fruit of large size and handsome appearance, red, usually striped with yellow; flesh tender and crisp, highest quality, preferred by many people to any other variety for either table use or cooking purposes. Takes 12 to 15 years to come into bearing, which is the only thing that keeps it from taking place as one of the most important commercial varieties. Very productive when once into bearing, and fruit of large size, fine shape, splendid quality and attractive coloring sells for higher prices than almost any other winter apple. One of the best keepers, retains its flavor and crispness to end of season. Tree very healthy, rugged, strong grower. November to March.

Northwestern Greening. More hardy than R. I. Greening, will succeed where climate is too cold for that variety. Tree vigorous, strong grower, productive. Fruit greenish-yellow, large, mild, sub-acid. November to March.

Paragon. Large to very large; deep red; tender yet firm; one of the handsomest apples grown; quality extra good. Tree hardy, vigorous, very productive. Season December to May.

Pewaukee. A good commercial apple for cold sections, and like the Duchess of Oldenburg thrives equally well in the North and South. Medium to large, surface yellow partially covered with dull red, striped and splashed. Flesh yellowish-white, breaking, juicy, with sub-acid flavor, spicy and good. Tree strong grower, heavy bearer, very hardy. Good shipper. November to March.

R. I. Greening. Large; greenish-yellow; flesh yellow, fine-grained, tender, crisp, juicy, sub-acid. Fine for cooking. Very productive. A good variety to grow with Baldwin for commercial orchard. November to March.

Winter Banana

Winter Apples—continued

Rome Beauty. A large, handsome, bright red apple of high quality, growing in popularity in all sections. Flavor and quality above the average, and because of its rich color and smooth and uniform fruit of large size is especially adapted for packing in boxes, always sells at good prices. One of the best storage apples, none keeps better. A good cooker and especially fine for baking. Tree a good grower, blooms late, comes into bearing in three years and never fails to have heavy crops each year. Adapted to wide range of soils and conditions, largely planted in New York and New England, one of the finest for Pennsylvania and Virginia, and widely grown in Central Western States.

Spitzenburg (Esopus). Medium, dull red; flesh yellow, firm, juicy, delicious, sub-acid. November to March.

Stark. A good commercial variety, grown successfully over a wide range of territory, known in practically all apple growing regions. Tree thrifty, hardy, very productive, early bearing. Fruit large, roundish, golden green, shaded with dark and light red; flesh yellowish, juicy, mild, sub-acid. A good keeper. January to May.

Stayman's Winesap. Truly a great apple, one of the finest in cultivation, now attracting attention everywhere. Desirable for home use, also a most profitable commercial variety. Has size, color, productiveness and quality to recommend it. Dark, rich red apple, striped more or less with yellowish-green; flesh firm, crisp, fine-grained, exceedingly juicy and spicy, one of the finest for baking. Tree bears in five years, quick, strong grower, great drought register, one of the best to plant on dry hills; wonderfully productive. Fruit keeps well, one of the best shippers, and brings highest prices. In Pennsylvania, Maryland, Virginia, West Virginia, Ohio, Indiana, Illinois, Missouri, Kansas and Iowa and all middle and southern latitudes this variety takes a leading place.

Talman Sweet. Medium, pale whitish-yellow; flesh white, fine grained; very hardy and productive. Fruit much esteemed for baking and cooking. The best winter sweet apple for home and market for all sections. November to March.

Wagener. An apple of superior excellence. Bright red with some pale yellow; fine texture, high flavor, excellent quality. Largely planted in the West, and one of the most popular varieties in Michigan. Bears young and should be thinned to get best results. Tree dwarf grower, one of the best fillers. Wagener apples are always in demand and bring quick and sure returns. November to February.

Wealthy. An American apple particularly valuable for cold climates. An excellent and valuable sort that has made its way to the front rank because it has paid, being one of the best money-making sorts grown. Bears extremely young, never fails to show heavy crops annually. Fruit brilliant red, smooth, large and handsome; splendid quality, good keeper, a popular market sort. One of the most profitable varieties for orchards near New York and other large Eastern cities, and because of its extreme hardiness largely planted in Michigan, Minnesota, Wisconsin, Maine and New England States, November to January.

Winter Banana. An excellent new apple, standing in a class by itself. Very showy in appearance, large size, roundish, deep yellow with red cheek, heavily waxed, attracts attention at once. Tender and delicious, with banana perfume. Especially adapted for the home orchard or local market, commands top-notch prices. Tree bears at an early age. In season in November and keeps well till spring.

Wolf River

Wolf River. A giant show apple of immense size and beauty, a highly colored red apple largely in demand and often selling as high as 25 cents each on Eastern fruit stands because of its large size and handsome appearance. Flesh white, sub-acid, good quality. Tree very hardy and productive, bears early and annually, a most profitable commercial variety, 80 to 100 apples fill a bushel box. September to December.

York Imperial (Johnson's Fine Winter). Medium, whitish shaded crimson; firm, crisp, juicy, mild, sub-acid. Very popular in Pennsylvania and the middle South. November to February.

Crab Apples

See Price of Apples Page 2

Excelsior. Fruit very large, nearly as large as a medium sized apple. Yellow, splashed with red. Fine flavor, good for cooking. Tree very hardy and productive, ripens early, season September and October.

Hyslop. Large, dark rich red, flesh yellow, sub-acid; productive, hardy and popular. October.

Martha. One of the largest and finest crabs; red and yellow. Fine for sauce. October.

Transcendent. Large, yellow with rich crimson cheek. An improved Siberian crab. September.

Whitney. Large, greenish striped with carmine; flesh firm, juicy and rich. Season last of August.

McIntosh Dwarf (Doucin) 3 Years Old

Patchogue, N. Y., Mch. 25, 1915.
Trees we got from you a few years ago are fine and one Apple, one Pear and one Peach had fruit on and was fine. The Pear had Pears on the same summer we planted and last year had 27 ripe pears; that was the second summer. I think that was doing some, don't you?

CHAS. DODT.

Rosendale, N. Y., Mch. 23, 1915.
Trees and Grapes you sent me last year are all right, so are those for my neighbor, Mr. Meier, who ordered after he saw my stock.

PAUL ULRICK.

Dwarf Apples

Recommended for city gardens or wherever space is limited. They require so little room that any one having a few square rods of land can plant enough trees to have a good home supply of fruit. Dwarf Apples are easily cultivated, bear fruit much earlier than Standard Trees. They make but little shade and may be trimmed and trained on wire to grow in almost any shape. We can furnish the following varieties in Dwarf Apples, for descriptions of fruit see same varieties under Standards.

Yellow Transparent	Rhode Island Greening
Duchess of Oldenburg	Wealthy
McIntosh Red	Baldwin

Price of Dwarf Apples: 40 cents each, \$3.50 per 10.

Brook, W. Va., August 16, 1915.

I write you a few lines in regard to the fine Apple Trees you sent me March 8th. Out of 52 trees I haven't seen a dead one yet. I have ordered from four or five different nurseries and never had such good luck or such fine trees. THOS. S. IRWIN.

Butman, Mich., March 29, 1915.

Trees I bought last spring from you I received in very good condition and every one of the 110 trees is growing. I am very much pleased and hope to get the same this year. LOUIS USTRNUL.

Saginaw, West Side, Mich., August 8th, 1914.

Every one of those 400 Apple Trees got from you this spring grew. The last one to grow sprouted about July 10, but it grew. That is pretty good, is it not? J. STROBEL.
(This is the 3d consecutive year we have shipped trees to Mr. Strobel.)

Schenectady, N. Y., May 13, 1915.

Shipment arrived in fine condition on the 4th. Am especially pleased with the size, vigor and rootage of your currants and gooseberry plants.

REV. R. C. PENNEY.

WE PREPAY FREIGHT SHIPMENTS AS FOLLOWS.

On all orders amounting to \$10.00 and over we prepay freight anywhere in New York, New Jersey, Pennsylvania, Connecticut, Rhode Island, Massachusetts, Maryland and Ohio.

On orders amounting to \$15.00 and over we prepay freight shipments to West Virginia, Vermont, Maine, Michigan, Indiana, Illinois, Delaware, District of Columbia and New Hampshire.

On orders amounting to \$20.00 and over we prepay freight shipments to Virginia, Wisconsin, Tennessee, Minnesota, Iowa, Kentucky, North and South Carolina, Missouri.

Orders amounting to \$30.00 and over we prepay freight shipments to Mississippi, Georgia, Florida, Alabama, Kansas and Nebraska.

(We do not prepay any express shipments.)

Standard Pears

WE know of no more satisfactory fruit to grow than the Pear. They bear well, require little attention, and the Dwarf varieties need but little room and are attractive growers. Almost every place can afford room for a few trees, and for commercial orchards they are very profitable.

They thrive best on a strong loam with clay sub-soil, but will succeed in any garden soil. Our blocks this year are the largest and as fine as any we have ever grown. Trees are all budded on imported French Whole Roots, which insures finest root system.

Summer Pears

Bartlett. Ever popular and a general favorite. Large, beautiful and excellent; yellow, tinged with red; buttery and melting, with a rich, musky flavor. Tree vigorous and erect grower, bears young and abundantly. No pear equals the Bartlett for garden or commercial orchard planting. It is the leader among canning pears and when well grown is a universal favorite and commands top prices. Begins to bear the third year. Good as Standard or Dwarf. Sept.

Clapp's Favorite. Large, showy, fine looking pear of good quality, profitable for market. Golden yellow with red cheek; melting, juicy, with sweet delicate flavor, resembles Bartlett. Should be picked before fully ripe. Tree one of the hardiest, a vigorous grower and very productive. Good as Standard or Dwarf. August.

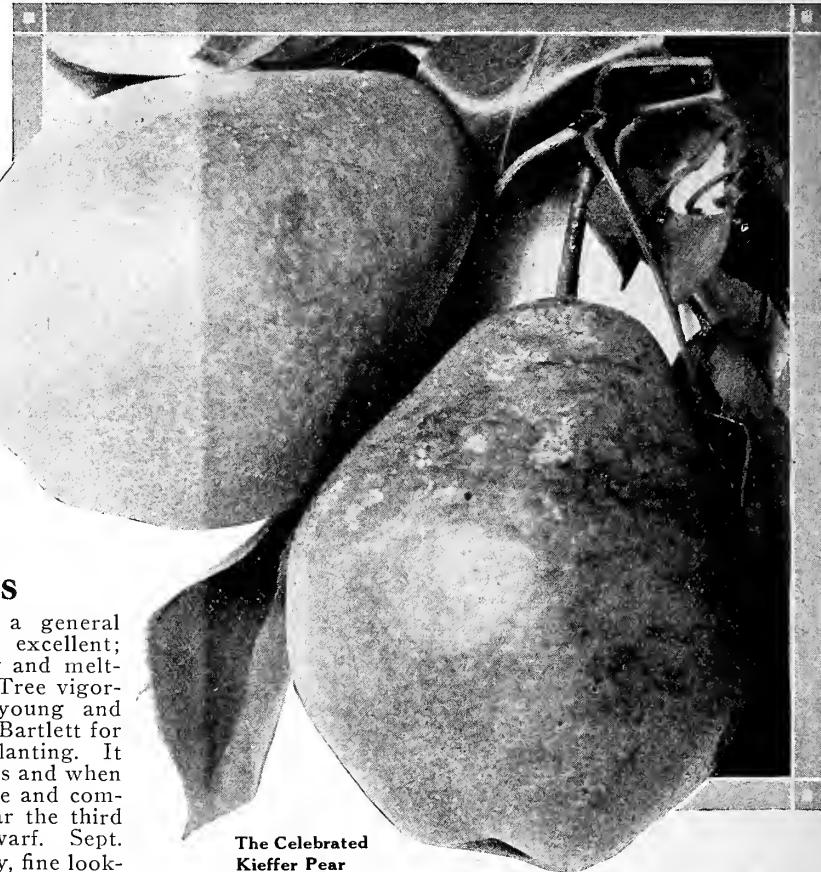

Autumn and

Beurre D'Anjou. Equal to Bartlett in quality and a close second to it in public favor. A delicious late fall pear that can be kept until the holidays. Large, handsome, greenish-yellow, blushed with crimson. Splendid for home use and best commercial pear of its season. Tree hardy, succeeds everywhere, bears heavy crops annually either as Standard or Dwarf. October to January.

Clairgeau. The fine size and exceeding beauty of this pear render it most valuable for market. The smooth yellow skin is shaded with orange and scarlet; the flesh is yellow, juicy, aromatic, and somewhat granular. The tree bears early and abundantly. October and November.

Price of Standard Pears:

XXX Extra, 5 to 7 ft., $\frac{3}{4}$ in. and up in caliper.....	Each	10	100
XX First Class, 5 to 6 ft., $\frac{5}{8}$ to $\frac{3}{4}$ in. in caliper.....	\$0.30	\$2.50	\$20.00
X Medium Size, 4 to 5 ft., $\frac{1}{2}$ to $\frac{5}{8}$ in. in caliper.....	.25	2.00	17.50
25 to 50 at 100 rates.	.20	1.50	12.00

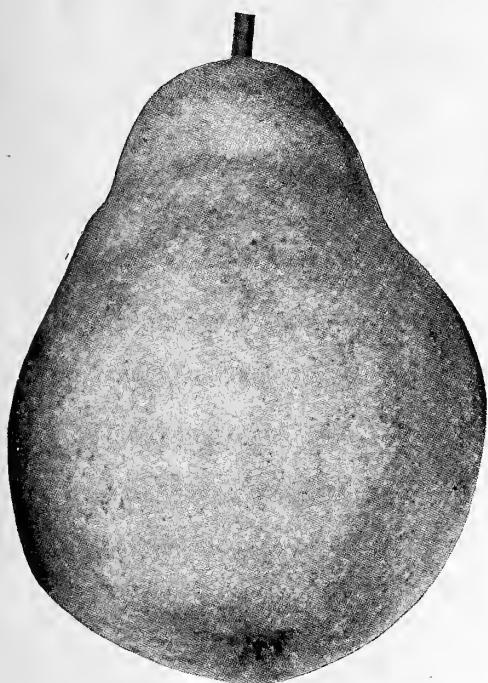

The Celebrated
Kieffer Pear

Wilder. Valuable early market pear of excellent quality, widely planted commercially. Fruit fair size, handsome, yellow with carmine-shading; fine grained, tender, juicy, sweet and pleasant flavor. Tree hardy, bears young, very productive. August.

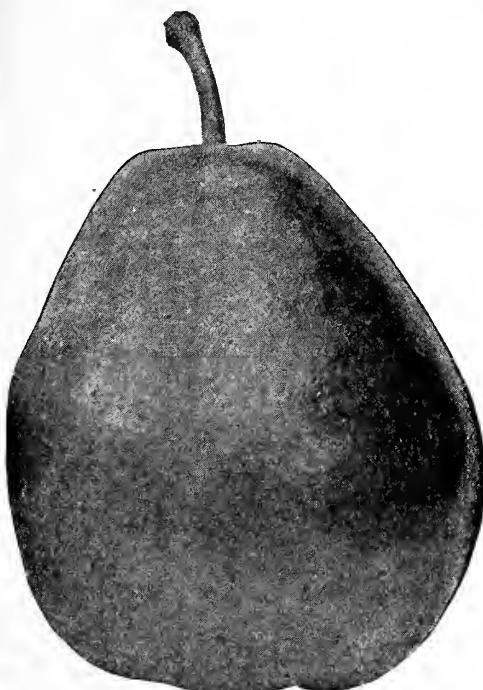

Winter Pears

Kieffer. Rivals Bartlett in popularity for commercial orchards. Tree remarkably free from disease, rapid, vigorous grower; wonderfully abundant and regular bearer. One of the most profitable varieties known, on account of its good shipping and keeping qualities, its magnificent size and wonderful beauty, always sells at good prices. Fruit golden-yellow when fully ripe, sometimes with light blush; flesh white, crisp, juicy. Exceedingly valuable for cooking and canning which brings out its spicy flavor. October to December.

Autumn and Winter Pears—continued

Bartlett

Lawrence

Duchess d'Angouleme. Large, greenish-yellow; tender, melting, buttery, juicy. Best as dwarf.

Flemish Beauty. Large, beautiful, juicy, melting, rich and fine. Strong grower and good bearer; hardy everywhere. September and October.

Garber. Large, bright yellow with red; juicy and good; a splendid canning pear. Resembles Kieffer in vigorous growth, ripens a month earlier, but is a handsomer and better eating pear. Sells well in any market.

Lawrence. Medium to large, golden yellow, with melting, aromatic flesh. Unsurpassed as an early winter pear. The tree is hardy, healthy and pro-

ductive, bearing large crops annually. November and December.

Seckel. Small, finest flavor; excellent for pickling and dessert; very productive. September.

Sheldon. Medium size, round, russet and red; melting, rich, very juicy, delicious. Fine for dessert; very productive; keeps well. October.

Worden-Seckel. A seedling of the Seckel; color golden-yellow with bright crimson cheek; flesh white, juicy, buttery, fine grained and melting; tree an upright, vigorous grower. Very hardy and abundant bearer.

Dwarf Pear Trees on Quince Roots

Price of Dwarf Pears, budded on Best Imported French Whole Roots:

	Each	10	100
XXX Extra, 3 to 4 ft., $\frac{1}{8}$ in. and up in caliper.....	\$0.25	\$2.00	\$15.00
XX First Class, 2 to 3 ft., $\frac{5}{8}$ to $\frac{11}{16}$ in. in caliper.....	.20	1.50	12.00

The dwarf varieties require less than one-fifth the space necessary for the standard varieties, and though the tree is dwarf the fruit is same size as standard, and is borne in large quantities. It is valuable both for the home garden and orchard planting for commercial purposes. It is a good filler for apple or standard pear orchards, because it is an early bearer and takes up but a small space. Trees should be planted ten feet apart. We can furnish the following varieties in Dwarf (for description see Standard Pears):

Bartlett, Beurre d'Anjou, Clapp's Favorite, Duchess d'Angouleme, Seckel.

Lonsdale, Minnesota, March 24, 1915.

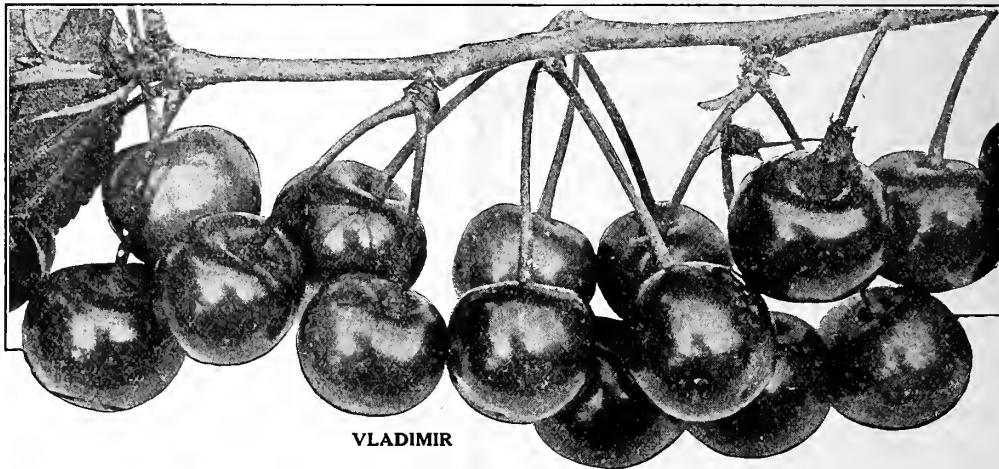

I bought quite a few fruit trees from you last year, all of which grew.

JOHN M. STICHA.

Thornton, Ill., Oct. 23, 1915.

Your letter received and am very much pleased to hear you will ship my order at once. I am also ordering a few trees for my father, who received trees from you last spring and he was very well satisfied, every tree is growing and they look beautiful.

MRS. LOUIS MANDELKOW.

Cherries

FEW fruits offer larger or better returns, and for either home use or commercial purposes the Cherry is without a rival. No fruit outside of apples generally does so well. Sandy or gravelly soil is best, but trees will thrive in any situation except a wet one. Trees are clean growers and steady bearers, coming into bearing when young,

Price of Sweet Cherries:

	Each	10	100
XXX Extra, 6 to 7 ft., $\frac{3}{4}$ in. and up in caliper.....	\$0.35	\$3.00	\$27.00

X Medium Size, 4 to 5 ft., $\frac{1}{2}$ to $\frac{5}{8}$ in. in caliper.....	.25	2.25	18.00

and yielding most satisfactory financial returns. A good bearing orchard from seven to ten years old will bring \$300.00 to \$500.00 per acre each year.

We have over 90,000 trees in our blocks this season, the finest and largest we have ever grown, all budded on the best imported French Roots. Plant from 15 to 18 feet apart each way.

Hearts and Bigarreaus (Sweet)

Bing. A new black cherry; originated in Oregon; size large, color blackish-purple; flesh very solid and of the highest flavor; tree vigorous, upright, hardy and productive; a fine shipping and market cherry.

Black Tartarian. This fine old variety produces immense crops of very large, purplish-black fruits of high quality, juicy, meaty, mild and sweet. The tree makes a beautiful, erect growth. Late June and early July.

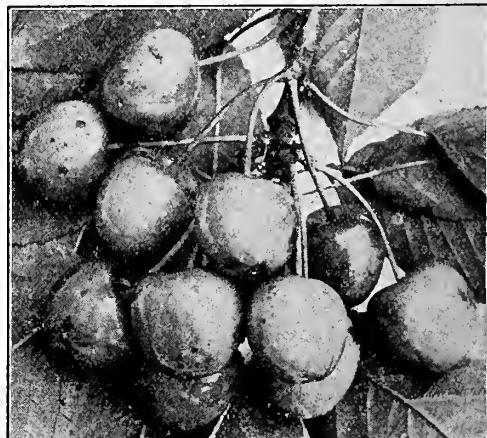

Centennial. A seedling of Napoleon, larger, sweeter, better flavor and with smaller pit. Color amber yellow, speckled and overlaid with crimson. Tree large vigorous grower with spreading open top. Productive. Last of June.

Governor Wood. Very large, rich; light yellow with red cheek; juicy and sweet. One of the very best. Late in June.

Lambert. One of the largest of all; heart shaped, dark purplish red, turning to almost jet black when fully ripe. Flesh firm, solid, rich and juicy, with sprightly flavor; seed very small for so large a fruit. Tree rugged, strong grower, hardy, enormous bearer. Late July.

Napoleon. Of fine appearance and the very largest size; yellow and amber, with bright red blush;

flesh firm, juicy, delicious. Profitable for market; finds a ready sale both for canning and dessert. Forms a grand tree. July.

Napoleon

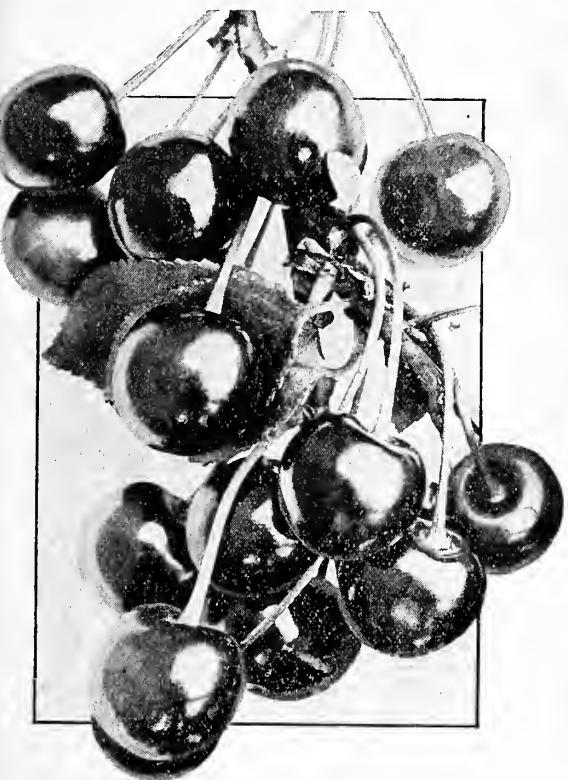

Montmorency

Sweet Cherries—continued

Schmidt's Bigarreau. One of the best market varieties, entitled to first place as a money-maker. Unsurpassed in size by any other black cherry, fruit one inch in diameter. Its glossy black color and round plump form tempt the eye, while its crisp, firm, juicy flesh and sweet rich flavor make it delicious to the taste. Tree is a vigorous grower, healthy and productive. July.

Windsor. A splendid, large, liver-colored cherry that hangs a long time and rots but little. The flesh is remarkably firm and good, tree very hardy and fruitful. Exceedingly valuable for late market and home use. July.

Schmidt's Bigarreau

Yellow Spanish. Large, pale yellow, with light red cheek; firm and delicious. Ripens latter part of June.

Dukes and Morellos (Sour)**Prices of Sour Cherries (except where noted):**

25 and 50 at 100 rates.			

Dyehouse. A hardy and valuable cherry. Unquestionably the earliest cherry, ten days earlier than Richmond, fine quality. Often bears at two years old, and has the appearance of being covered with a scarlet cloth, such is the abundance of the fruit. For tarts, pies, and especially for canning, it has no superior among cherries. June.

Early Richmond. Medium size, dark red, melting and juicy, acid flavor; one of the most valuable and popular of the acid cherries and is unsurpassed for cooking; tree slender grower, exceedingly productive and very hardy; will stand the most severe weather.

English Morello. The standard late sour cherry. Large and of handsome appearance, dark red becoming almost black. Fruit of good quality, tender and melting, very acid. Hangs long on the tree, good shipper.

Montmorency. Prominent for size; larger and sweeter than Early Richmond and fully ten days later. A large red acid cherry, very profitable; more largely planted for market than any other. Tree is hardy, of vigorous growth, exceedingly productive and the greatest money maker in the list. We recommend Montmorency for the bulk of the crop anywhere that cherries will grow. Late June.

Vladimir. A dwarf growing Russian variety, exceptionally hardy, a superior cold climate cherry of great commercial value. Dark red, juicy, sweet when ripe; size medium to large; excellent quality, wonderful and prolific bearer, often fruiting the second or third year.

Plums

THE plum has even a wider range of growth than the apple and adjusts itself to every variation of soil and climate. They give hugh crops in New England and on the bleak Western prairies, and Every State in the Union can grow a good assortment of varieties.

Plums come into bearing early, yield large crops and are delicious for dessert, jellies, preserves, etc., and find a ready sale on any market where choice fruit is appreciated. Land for plums should be well drained and on medium or good gravelly soil all kinds can be grown with success. Every farm should have an orchard of selected plum trees. Our trees are all grown on the Finest Imported French Whole Roots and are as fine as any we have heretofore offered.

American and European Varieties

Beauty of Naples. Medium size, greenish-yellow, very sweet; excellent flavor, fine for dessert. Tree very hardy and productive. September.

Bradshaw. Very large, purple, juicy, excellent quality. Tree vigorous and very productive. August.

Fellemburg. (Italian Prune). Heads the list for home or market. Very large, dark purple. Superb in quality, rich, juicy and very good. Bears well. September.

German Prune. Medium size, dark blue, juicy, rich. Tree upright, vigorous and productive. The German Prune is the prune with the real flavor, can be grown to perfection anywhere in the East and Middle West and will find ready market and yield big returns.

Giant Prune, or York State Prune. Very large, measuring $2\frac{1}{2}$ inches long and 2 inches in diameter; reddish purple, flesh yellow, sweet and firm, rich, delicious, freestone; an excellent shipper. September.

Green Gage. Small, delicious, very prolific; fine for table use. August.

Lombard. One of the most popular, grows anywhere. Violet red, juicy, pleasant and good. Tree hardy and immensely productive. August.

Monarch. Large, dark purple, freestone, delicious quality. Tree strong, upright and productive. Season last of September.

Moore's Arctic. A new plum originated in Maine, claimed to be the hardiest known. An early and abundant bearer. Medium size, dark purple, juicy, sweet, pleasant flavor. September.

Reine Claude. Large, yellowish-green, juicy, melting, sugary, with rich flavor, admirable for cooking or dessert. September.

Shipper's Pride. Very large, dark purple, juicy, sweet, fine quality. Hardy and productive. Sept.

Shropshire Damson (or Prune Damson). An English variety of great merit for preserving. Large and much more desirable than the common Damson. Tree vigorous grower; very free from attacks of curculio; hardy and an abundant bearer. October.

Tatge. Evidently a seedling of the Lombard. Is larger, more nearly round, darker in color and finer quality than that well known and excellent variety.

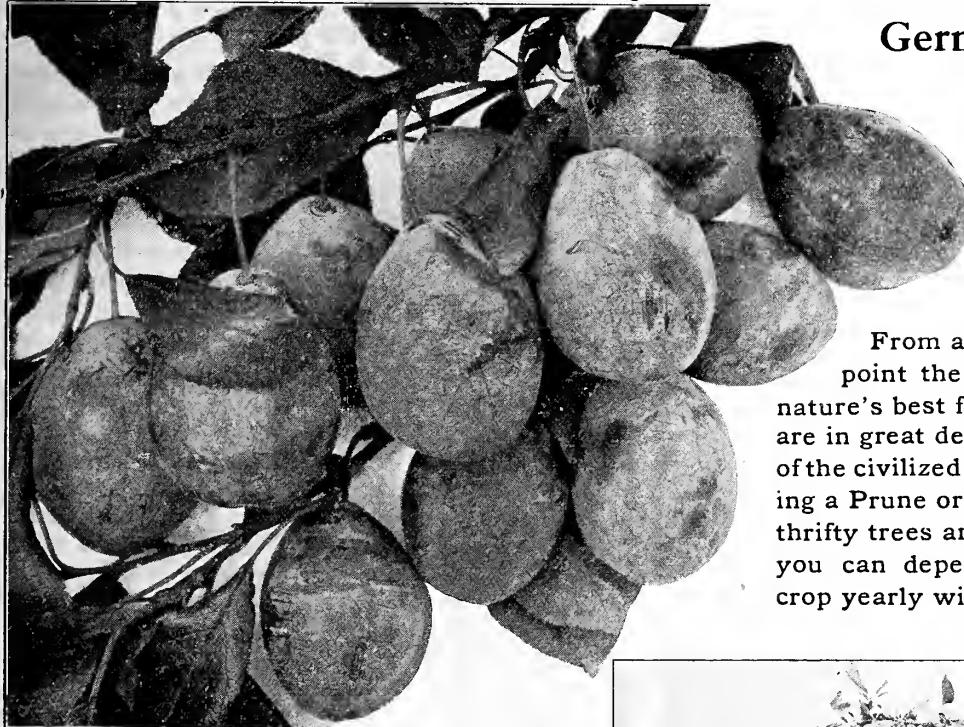

Yellow Egg. Very large, golden yellow; fine quality; very productive. August.

Good Trees

Top growth alone is not a safe criterion of the value of a tree or plant. You depend on the roots to take up nourishment and moisture from the soil, and the growth and development of your trees depends largely on the root system. Our stock combines abundance of fibrous root growth with well developed, straight, strong stems and well shaped tops, making ideal, well balanced trees with good root systems, sure to make quick, strong growth and produce satisfactory results.

Block of 100,000 Plums

German Prune

*See description
on
opposite page*

From a medicinal stand-point the Prune is one of nature's best fruit foods. They are in great demand in all parts of the civilized world. In planting a Prune orchard set out good thrifty trees and in a few years you can depend upon a heavy crop yearly with big returns.

Japanese Varieties

Abundance. Fruit large, showy and beautiful. Color amber, turning to a rich, bright, cherry red, highly perfumed. Flesh light yellow, juicy, tender and delicious, freestone. The tree is hardy, a strong, upright grower and immensely productive. Early.

Burbank. Flesh yellow, firm, tender and very juicy, rich, sweet and aromatic. Blooms late, very productive. Tree spreading and hardy. One of the best for general planting. Medium.

Red June. Fruit medium to large, deep vermillion red, very showy, flesh light lemon yellow, slightly sub-acid; half cling, pit small. Tree hardy, upright and productive. Earlier than Abundance.

Satsuma. Fruit large, reddish-purple with blue bloom, quality fine, pit remarkably small. Tree perfectly hardy and a vigorous grower. September.

Limerick, Maine, June 1st, 1915.

We are more than pleased with the trees and wish we had ordered more. I am in the City of Biddeford with my last load of Apples. I am getting \$2.50 and \$2.75 per barrel in return for Ben Davis and from \$3.00 to \$4.00 for Russets.

A. J. SEDGLEY.

Stettlersville, Pa., April 26th, 1915.

Trees and plants arrived O. K. Everything is very nice. The trees are as fine a lot as we ever got, also the Plum Farmer Raspberry Plants.

GEO. H. REX & SON.

Babylon, N. Y., Aug. 27th, 1915

The picture of Burbank Plum I am sending you is one I bought in Spring 1914. It surpasses any around here for its age. It is 5 ft. 7 in. high, and one branch alone has 5 plums on it this year, over 100 plums on it this year. One of my Grape Vines is bearing heavy, will send a picture of it a little later. Lots of people come to see them and think them wonderful.

JOSEPH COVERT.

Peaches

A Good Peach Orchard, well handled, is a regular gold mine, and hundreds of growers have made fortunes on their Peach Orchards within a very few years.

Peaches should be planted about eighteen feet apart, and do best on a sandy loam. To secure healthy, vigorous and fruitful trees and fine fruit, the following points must be well attended to: First—keep the ground clean and mellow. Second—keep the heads low; the trunks should not exceed three feet in height. Third—give them an occasional dressing with wood ashes. Fourth—prune every

Prices of Peaches (except where noted):

X Medium Size, 3 feet	.10	1.00	6.00	50.00

25 and 50 at 100 rate; 250 and over at 1000 rates.

Belle of Georgia. Very large, skin white with red cheek; flesh white, firm, of excellent flavor. Fruit uniformly large and showy. Tree a very prolific bearer. A fine shipper, a most profitable commercial variety in the North as well as the South. Ripens with Crawford Early.

Beers' Smock. A large, yellow flesh peach, an immense improvement on Smock's Free, a better annual bearer. One of the most desirable and profitable market sorts. Last of September.

Carman. Large, oblong, pale yellow with deep blush; flesh tender, juicy and fine flavor; very hardy and a heavy bearer. August.

Chair's Choice. Large, deep yellow, red cheek; firm; a few days earlier than Smock.

Champion. The best of all the white freestones, ripening about September 1st. A valuable variety for the home or commercial orchard. Delicious, sweet, rich and juicy. Skin creamy white with red cheek, strikingly handsome. It is early, largest size and highest flavor. Tree hardy and productive.

Crawford's Early. Very large, yellow, rich, sweet luscious; free. September.

Crawford's Late. Very hardy; large, yellow, rich, sweet; free. September.

Early Elberta. Originated in orchard of Dr. Gleason, of Kaysville, Utah. A beautiful, large, golden-yellow peach with red blush on sunny side, coloring all over before it ripens. Comes in 10 days ahead of Elberta, fruit larger, more highly colored, and far better in quality. Flesh fine, firm, juicy and deliciously flavored; a splendid keeper and shipper. Tree a strong vigorous grower, much hardier than Elberta, an extra heavy and reliable bearer.

Price:	Each	10	100
XXX	\$0.25	\$2.25	\$17.50
XX	.20	1.75	12.50

Elberta. One of the finest yellow freestone peaches, best known and very popular. The standard market sort both North and South and more widely planted and has made more money for commercial orchardists than any other variety grown.

spring, shortening the shoots of the previous year's growth; this keeps the head round, full and well furnished with bearing wood. Cut weak shoots back about one-half, and strong ones one-third; but see that there is left a sufficient supply of fruit buds. Young trees should be well mulched every spring, or kept well cultivated until the middle of July each year.

Our peach trees are all budded on seedlings grown from natural Tennessee peach seed, which makes them healthy, vigorous and long lived, and are budded as far as possible from select bearing orchards.

	Each	10	100	1000
XXX Extra, 5 to 6 ft., $\frac{5}{8}$ in. and up in caliper	\$0.20	\$1.50	\$12.00	\$110.00

X Medium Size, 3 feet	.10	1.00	6.00	50.00

Fruit yellow with red cheek, large size, handsome. Flesh yellow, juicy and of good quality. Ripens slightly later than Early Crawford.

Fitzgerald. A native seedling, as large or larger than Crawford; freestone, very best quality. A heavy bearer, fruiting very young, almost invariably the second year after planting. Very hardy. Fitzgerald ripens just after Crawford's Early.

Early Elberta

New Hale Peach (Actual Size)

The New Hale Peach. King of All Peaches. The greatest commercial peach of its age. Combines all the qualities most desired. Immense size, fully one-half larger than Elberta. Brilliantly colored, deep-golden yellow overlaid with most attractive carmine blush. Skin thick, smooth and velvety, without fuzz. Flesh deep yellow, very solid, firm and fine grained; tender, melting and luscious, with most delicious peachy flavor. Perfect free-stone, parting very freely from the pit. Wonderful keeper and shipper, almost as solid as an apple and firm enough to ship in barrels. Fruit colors all over a week or ten days before fully ripe and can be picked early and will mellow up and become ripe and edible so that extra early picking can be started. Also remains much longer on the trees than any other known variety so that the season of marketing can be considerably lengthened at both ends. Tree thrifty grower, hardier than Elberta and enormously productive. Season of ripening just before Elberta. The fruit of **The New Hale** sells for one-third more than any other variety of its season. Our trees are guaranteed genuine, budded direct from a bearing orchard.

Price of the New Hale Peach: Each	10	100
XXX Grade	\$0.35	\$3.00
XX Grade30	2.50

Peaches—continued

Foster. Origin Massachusetts. A very handsome yellow peach, large size, very rich and juicy. Color deep orange-red, becoming very dark on sunny side. Ripens with Early Crawford.

Globe. A very large yellow peach, globular in form, of good quality. Flesh firm and juicy, yellow shaded with red toward pit. Tree a rapid, vigorous grower and enormous bearer. Sept. to Oct.

Greensboro. Larger and earlier than Alexander and is nearly free-stone. It is colored beautifully with crimson and has a yellowish cast; the flesh is white and of good flavor. The peach is large, many specimens of this variety measuring 8 to 9 inches in circumference. Productive.

Lamonte. Improved Late Crawford. Magnificent large yellow peach of good quality, tree vigorous and productive. Its fine size, beauty and productiveness make it one of the most desirable sorts.

Mountain Rose. Large, red; flesh white, juicy, rich and excellent. One of the best early peaches. Should be in every collection. First of August.

Salway. Very large, yellow, firm, juicy, melting, rich; very late, ripening in October; free.

Stearns. A large, yellow peach, originated in Michigan. Size equal to Elberta when properly thinned, and much superior in quality, beauty and hardiness. An exceptionally good shipper.

Triumph. It ripens with Alexander, blooms late, has large flowers; a sure and abundant bearer. The fruit is of large size, with a very small pit, and is indeed beautiful. Surface is yellow, nearly covered with red and dark crimson in the sun; flesh bright yellow, free when fully ripe and of excellent flavor.

Wheatland. Extra large size, handsome golden color; ripens between Early and Late Crawford; excellent quality; very firm and bears shipment well; freestone.

Wonderful. Large, rich golden yellow; flesh yellow, rich, highly flavored; free. September.

Yellow St. John. Large, roundish, orange-yellow, with deep red cheek; juicy, sweet and high flavored; flesh yellow, prolific; an excellent peach. Very early.

Clinton, Iowa, Feby. 16, 1915.

The 20 Peach Trees I got from you last spring are growing, every one of them. If ever I need anything in the nursery line will remember you and recommend you all I can.

MICHAEL HANSEN.
Greenville, Del., April 29, 1915.

Your trees and bushes received in the finest condition, and I thank you for your prompt delivery.

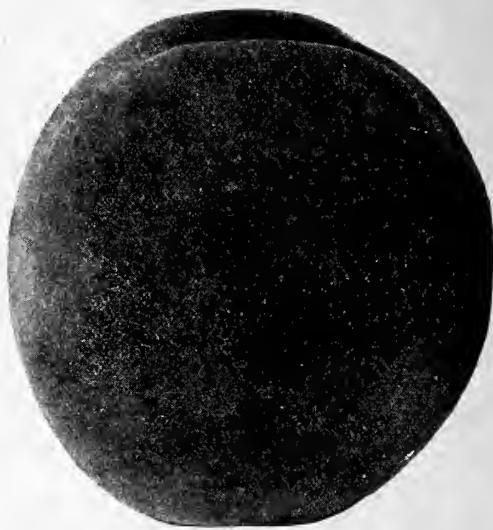

MRS. J. B. STAHL.

Peaches—continued

Rochester Peach (New). The Greatest Early Market Peach for the Northern States. A large yellow and red, free-stone, ripening middle of August, two weeks before Early Crawford. Comes in when there is no other yellow and red free-stone of quality on the market and consequently commands highest prices. The fruit sold at one dollar per eleven-quart basket at local orchards this season. Originated at Rochester, N. Y., where the original orchard bore its sixth annual crop this season; fruit finest the trees ever produced, some specimens measuring twelve inches in circumference and weighing twelve ounces. Flesh golden yellow, very highly flavored, juicy and delicious; sweeter than Crawford, requiring only one-half the usual quantity of sugar in canning; stone very small. Keeps and ships as well as Elberta even after much handling. Tree strong, upright grower, very hardy; has stood 16 degrees below zero and produced full crops. More productive than Elberta. Bears very young; one of the trees planted by Mr. Yarker of Greece, N. Y., in the spring of 1914, produced 17 peaches in August, 1915, and Mr. Rudman of Irondequoit, N. Y., has one tree of the same age that bore 27 peaches the first year. Rochester is in a class by itself, the earliest and best yellow freestone peach for either home or market.

Price of Rochester Peach:

Size	Each	10	100
XXX	\$0.35	\$3.00	\$25.00
XX25	2.00	15.00

Rochester Peach (Reduced)

Early varieties bring highest prices; that is why we recommend Rochester as one of the most profitable peaches you can plant.

Quinces

The quince is attracting a good deal of attention as a market fruit. The tree is hardy and compact in growth and requires little space; is productive, gives regular crops and comes into bearing early; the fruit is much sought for canning. It will grow in any good garden soil, which should be kept mellow and well enriched. Fruit should be thinned out if it bears too freely.

Price, budded on Best Imported French Whole Root:

	Each	10	100
XXX Extra, 4 to 5 ft., $\frac{5}{8}$ in. and up in caliper.....	\$0.30	\$2.50	\$23.00

25 and 50 at 100 rates.			

Bourgeat. A French variety. Very productive, healthy and thrifty. The fruit is very large, smooth golden yellow, of the best quality, tender; ripens just after the Orange, and will keep past midwinter in perfect condition.

Champion. Very large size, rich golden yellow when ripe; great bearer; very late. November.

Orange. Very large, bright golden yellow, fine quality; flesh firm, cooks tender. October.

Rea's Mammoth. Very large, bright golden yellow. Ripens very early; very prolific. October.

Apricots

Apricots are a rich, delicious fruit, coming between cherries and peaches. Very much like the peach in outward appearance, but like the plum in quality and texture. One of the finest fruits for drying, and they fill a season when there are no other large fruits.

Price of Apricots:

	Each	10
XXX Extra, 4 to 5 feet, $\frac{5}{8}$ in. and up in caliper.....	\$0.30	\$2.50

Acme. A new and fine variety. Tree stout, healthy and hardy; handsome foliage. Fruit large and sweet; rich yellow with red cheek. July.

Superb. Without question the best apricot now being offered. Originated in Kansas. Magnificent tree, large and spreading, with broad, glossy leaves.

Perfectly hardy and has no superior in productivity. Color beautiful yellow with slight blush; flesh firm and solid. One of its many desirable traits is its long season, covering a period of three weeks. Price, 50cts. each; \$4.00 per 10.

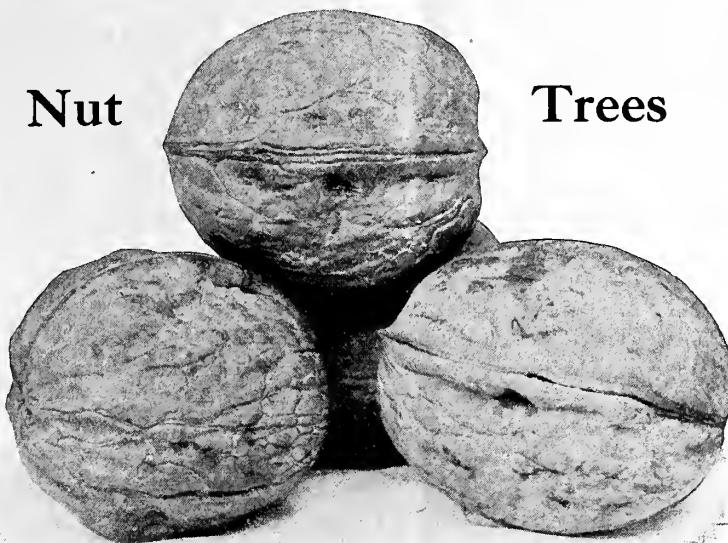

Harris. Rich golden yellow; large size, very fine quality; hardy; early bearer and prolific.

Montgamet. Medium size; early; juicy and excellent; hardy. July.

Moorpark. Large; orange and red; firm and juicy, with rich flavor; very productive. August.

Ordering
Trees
This Spring
Why
Not Get a
Few
Nut-Bearing
Trees

Nut Trees

English Walnuts

The people of the United States are becoming more interested in nut-growing each year. Returns from established nut-bearing orchards show plainly how profitable nut culture may be made. One orchard of 225 English Walnut trees near Rochester, N. Y., produced over 100 bushels of nuts that sold for \$5.00 per bushel.

Nuts are in steady demand; the call for them extends practically over the entire year; they are among the most wholesome and necessary foods, and there is no such thing as an over supply. The trees are longer-lived than most fruit trees; they are not excelled in beauty by any of the elms, maples, etc., and will bring you good revenue while they are growing into valuable timber.

Chestnuts

American Sweet Chestnut is adapted to a great portion of this country. It is valuable as a nut producing tree, timber and ornamental purposes. As high as \$14.00 per bushel has been paid for American Sweet Chestnuts when first brought into New York market. \$6.00 to \$10.00 per bushel is the common price. 4 to 5 ft., 50 cts. each.

Paragon (Japanese). Nuts are of superior flavor and sweetness. It comes into bearing at three to four years of age. Very productive. 4 to 5 ft., 75 cts. each.

Hickory Nuts

Shellbark. A peculiar, rich native nut, in flavor excelled by none. 75 cts. each.

Butternut

Butternut. A native tree, valuable for timber, and bears an oblong, thick-shelled nut; delicious flavor. 5 to 6 ft., 50 cts. each.

Clinton, Conn., Feby. 15th, 1915.

I have ordered from you the last two years and all trees were all right. HY. KÖZLIK.

Big Profits in Raising Nuts Be One of the Far-Sighted Ones and Plant an Orchard of Nut-Bearing Trees This Year

Walnuts

Black. A native tree of large size and majestic form. The most valuable of all trees for its timber; rapid grower, producing a large round nut of excellent quality. 5 to 6 ft., 50 cts. each.

English, Persian or Madeira. A fine, lofty-growing tree, with handsome, spreading head; produces large crops of thin-shelled, delicious nuts which are always in demand at good prices. An exceedingly handsome tree for the lawn. 3 to 4 ft., 50 cts. each.

Japan (Sieboldi). Perfectly hardy; rapid-growing, handsome form, immense fern-like leaves, making one of the finest ornamental trees; bears young and abundantly. Nuts produced in clusters and resemble butternuts in shape and quality, but somewhat smaller and with thinner and smoother shell. Worthy of extensive planting. 3 to 4 ft., 50 cts. each.

New Wilmington, Pa., March 1st, 1915.

Have just received a letter from a friend enquiring where to purchase trees and as the ones I received from you have proved satisfactory have referred him to you.

CHAS. W. MEANS.

Jermyn, Pa., Mch. 23, 1915.

I had a hundred trees from you two years ago so that I know the quality will be all right.

W. I. TAYLOR.

Turner, Maine, April 13, 1915.

Last year your shipment arrived in good condition, every tree lived.

GEO. M. BRIGGS.

Frederick, Maryland. Aug. 1st, 1915.

The plants I got of you in the spring all grew, also the Walnut Tree, they look nice.

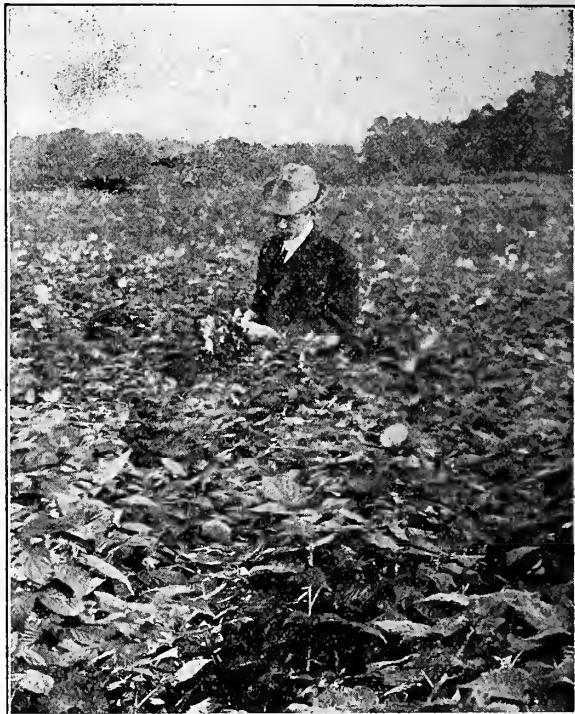

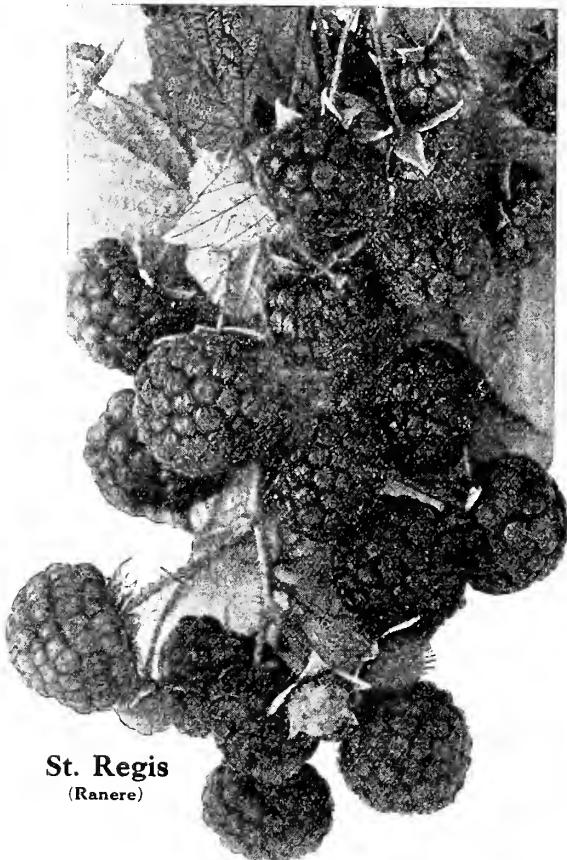

MRS. WM. B. MacKENZIE.

Raspberries from June to November

Plant St. Regis (Ranere) Everbearing for Profit—
the greatest money-maker ever produced.
Full crops for four months

A wonderful new Red Raspberry, bears fruit for four months the first season it is planted. Earliest of all red raspberries, begins to ripen June 15th to 20th, fruiting on old canes until late in August, when berries begin to ripen on the young or current season's canes, which continue to produce berries in increasing numbers without intermission until late in October, or until frost comes. Wonderfully prolific, first or main crop being greater than that of any other red variety known, and summer or autumn crops do not consist of a few scattering berries, but good to heavy pickings all the time. Berries remain large, firm and full flavored until the very last. Fruit is bright crimson, large size and of surpassing quality, firm in texture, an unexcelled shipper. A rich, sugary berry, with full raspberry flavor and most delicious. Canes are of stocky, strong growth, and plants are absolutely hardy, enduring the severest cold uninjured. Will succeed on all soils. Set early in April, will give ripe berries the first season.

Price of St. Regis: 10c each; 6 for 50c; 12 for 75c;
100 for \$3.00.

St. Regis Raspberries in Our Nurseries

Oct. 20th, 1913.—We are picking raspberries off the St. Regis Raspberry and they taste good this time of season.—Samuel E. Weyant, Esterly, Berks County, Pa. (Plants purchased Spring, 1913.)

Our plants are guaranteed genuine St. Regis.

Holland Patent, N. Y., Feby. 14th, 1914.
Trees you sent last year were all right; I prize them very highly. The strawberries had berries on them, so did the St. Regis, just as you said, for four months.

H. S. SYKES.
Mt. Vernon, Ohio, Oct. 20th, 1914.
Enclosed find check \$5.00, for which send full amount in St. Regis Everbearing Red Raspberries. The ones I got before are still bearing. Picked berries from them last Sunday and there are more to ripen yet.

DR. E. C. BEGGS.
Eagle Harbor, N. Y., November 10, 1915.
Have been picking St. Regis Raspberries for my own use and for market since the middle of June. Picked about three quarts the second of this month and there are quite a few berries on the bushes now.

THOS. DRAPER.

Get Your Trees and Plants Direct from the Nursery Center of the World

Raspberries—Red and Purple Varieties

Raspberries are easy to grow and profits are large. Do best on upland, sandy or clay loam, but will succeed on any well drained soil. Set in rows 6 feet apart and 3 feet apart in the row. Keep ground light, rich and clean. Average yield about 2,500 quarts per acre, but a great many berry growers have larger returns.

Price of Raspberries (except where noted)

Columbian. The Columbian is a cross between the Cuthbert and Gregg, hardy even in Wisconsin. A most vigorous grower; canes 10 to 16 feet in length and often over an inch in diameter. Fruit very large; color dark reddish-purple; adheres firmly to the stem; seeds small; has a distinct flavor of its own, making it a most delicious table berry. For canning purposes it is much superior to any other.

Cuthbert, or Queen of the Market. A remarkably strong, hardy variety; stands the northern winter and southern summer equal to any. Berries very large, measuring three inches around, conical, rich crimson, very handsome, and so firm they can be shipped hundreds of miles by rail in good condition;

Keep down all new canes except five or six of the strongest near the parent plant. Cut out and burn all old canes as soon as they are through fruiting. Cut back all canes to about 36 inches early in the spring and shorten lateral branches if they have made a large growth, to about 18 inches.

Doz.	100	1000
\$0.50	\$2.00	\$12.00

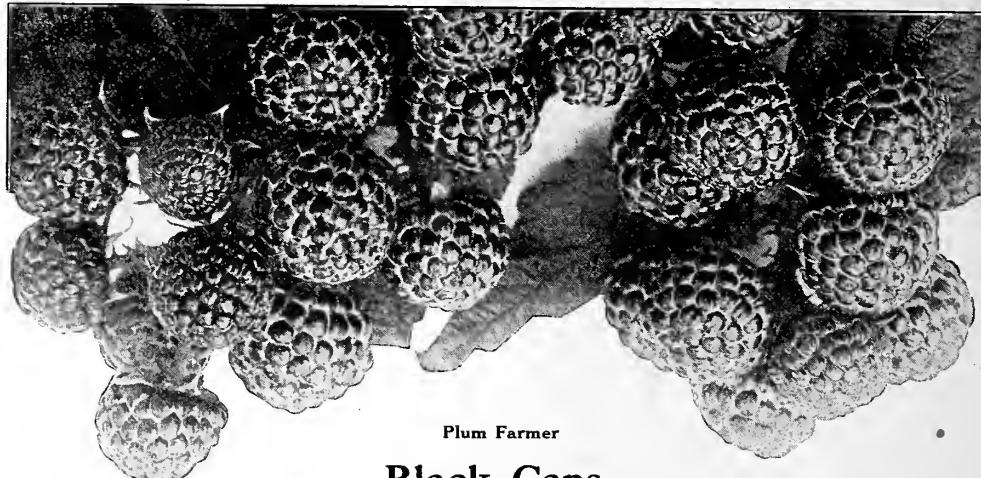

flavor is sweet, rich and luscious. The leading market variety for main crop.

Herbert. A Canadian seedling. Has been tested at New York Experiment Station and by many large growers, all giving it very favorable reports. Canes very strong and vigorous. In hardiness it easily takes first place, having stood 40 degrees below zero. Fruit bright red, somewhat oblong, the largest of all red raspberries. Flavor very sweet and juicy, the very best for table use. Enormously productive, will bear twice the crop of either Cuthbert or Loudon, under the same conditions. Holds its size well to the end of the season. 3 for 25 cts., 12 for 75 cts., 100 for \$4.00.

GROW FRUIT FOR PROFIT

There never was a better time to go into the fruit business than right now. Today we are facing a greatly increased consumption and demand. People are being educated to use more fruit and to realize that no other food stuff has such beneficial results. More fruit and less meat will soon be the national diet slogan. This is a SPLENDID OPPORTUNE TIME to plant a good orchard.

INTEREST YOUR NEIGHBORS IN FRUIT! Better markets can be secured where larger plantings are made and your orchard will be more profitable if you can induce others in your section to set out more fruit and create a supply worth while to the buyers.

Black Caps

Black Raspberries. Allow only the five strongest new canes to grow. Cut out tops of new canes when they are 30 inches high. Cut out and burn all old canes immediately after fruiting. If the new canes grow longer than 20 to 24 inches, cut them back to 18 inches early in spring.

Prices same as Red and Purple Varieties

Cumberland. The largest of all the black caps; a healthy, vigorous grower, throwing up stout, stocky, well branched canes that produce **immense crops of magnificent berries.** Very hardy, having stood 16 degrees below zero. Fruit very large, firm, fine quality. The most profitable market variety for main crop.

Black Diamond. A large, handsome berry of great productiveness and splendid keeping and evaporating qualities; sweet; excellent.

Gregg. The standard late sort. Very large, strong and thrifty. Hardy and good yielder.

Mr. Arba Rogers, of Elmira, N. Y., writes us Sept. 20th, 1915, in placing his order, as follows: "Have decided to place order with you after looking up ten different nurseries."

On Nov. 1st, 1915, after receiving his shipment he says:

"The 55 Apple Trees received in first class condition. I judge you use painstaking care in boxing and packing. I am greatly pleased with the appearance of the stock received. Trees look fresh lifted and thrifty. I shall be ready to recommend you to any who wish to purchase trees. I am pleased that I gave the order to you even after considering several other nurseries. Thanking you for enabling me to get a fine orchard started, I remain,

Yours truly,

ARBA ROGERS."

378

Canton, Ohio, Oct. 11, 1915.

The trees we received from you in Fall of 1913 are doing fine.

MRS. J. D. KING.

Ohio. The standard early berry. Very productive. Fine quality; very hardy. Yields more pounds of fruit per bushel than any other variety; is best for evaporating.

Plum Farmer. This wonderful new black raspberry has been thoroughly tested and is a great favorite for home use, and one of the best commercial sorts for all sections. A vigorous grower, hardy and very productive; one of the best to withstand drought. Fruit enormously large, covered with a grayish bloom like the bloom on a grape; matures early, easily picked, ships well, sells at highest prices.

Craigville, N. Y., Oct. 4, 1915.
Everything purchased from you this spring is doing nicely.

HENRY MARTIN.

Ulster, Pa., Nov. 11th, 1915.
My Peach Trees received and set out four days after leaving nursery. They were packed so I think they would have kept all winter. I never saw nicer trees and am more than pleased with them. Of the 96 trees I set in the spring all but one is living, and they all grew very fast. I feel very proud of them, also every one of the 412 berry bushes I set last spring grew, and shall look for a nice lot of berries next year.

A. B. GORE.

Silver Lake, Mass., Feby. 9th, 1915.
Your trees have done fine that were set two years ago this spring; 2 apple trees are showing fruit buds; 2 of the cherry had a small amount of fruit after having been set one year and are budded full for this year. I think your trees are the best I ever set.

EDNA MAGLATHLIN.

Even a small plot of Black Raspberries will yield handsome returns. In Pennsylvania one of our customers produced 225 quarts of berries on 1-10 acre and sold the fruit at 10 cents per quart.

Blackberries

Eldorado. A strong growing hardy variety; very productive; fruit very large, jet black, in large clusters, ripening well together. Its keeping quality is unsurpassed. Fine quality, sweet, without core.

Do best on deep, well drained soil inclining to sand, but will do well on any soil that will grow good corn. May be grown by everybody; hardy and rugged in growth; heavy and regular producers. Blackberries are the best yielders of cane fruits, averaging 3,000 to 4,000 quarts per acre, and fruit now sells 20 per cent higher prices than 3 years ago, rarely selling for less than 8 cents per quart; most generally bringing 10 to 15 cents per quart. Set in rows 7 feet apart, plants 4 feet apart in the row, 1,556 plants to the acre. Keep clean and well cultivated.

Price (except where noted), strong root cuttings, not sucker plants, 60c doz.; 100 for \$2; 1000 for \$15.

Blower. Originated in the celebrated small fruit belt of Chautauqua County, N. Y., the best all round blackberry; big and luscious; overshadows all others. A strong grower, never winter-kills, the hardiest and most productive of all. Berries rich in quality and quantity; bring highest prices on the market; always in demand. Has produced 2,694 berries on a single bush, 2,720 quarts on 1/3 acre. Jet black, largest size, good shipper, best quality; unexcelled productiveness are the main characteristics of this splendid new sort. **Price:** 10 cts. each, 4 for 25 cts., 12 for 60 cts., 100 for \$2.50.

Rathbun. Origin Western New York. A vigorous grower with strong stem, branching freely; will root from tip of branches like a raspberry. Hardy, having endured 20 degrees below zero, and produced a good crop. Produces its immense fruit abundantly. Fruit is sweet and luscious, without hard core, of extra high flavor, jet black, small seeds; firm enough to ship and handle well.

Erie. Fruit of the largest size, strong, healthy grower; free from disease; productive; very early; extra quality; good shipper.

Snyder. Early; good quality; immensely prolific; fair size; black, fine; one of the hardiest.

RHUBARB

Every family having ten square feet of land ought to have rhubarb patch, if nothing else is grown. Six roots set early in spring will supply a small family. Any ordinary garden land will grow rhubarb in abundance. Set plants 2 feet apart in row. Good culture and plenty of dressing will give profitable returns.

Strawberry Rhubarb. Those who have never grown

this variety, which is of superior quality, will hardly recognize the old "Pie Plant." It is early, tender, without being in the least tough or stringy, with a mild, sub-acid flavor. Color a beautiful strawberry-red. Rhubarb is one of our most healthful vegetables. Early in the spring its distinctly acid flavor is quite acceptable. 10 cts. each, 6 for 50 cts., 10 for 75 cts., \$4.00 per 100.

ASPARAGUS

This delicious and healthy vegetable should be found in every garden. Properly managed, a plot 12 feet square will supply an average family a meal per day for three months. Ground should be heavily fertilized and worked until fine and rich. Plant deep, set crown of plants 3 inches below surface of ground. For garden culture set 15 inches apart each way, 100 plants to 12 square feet. For large plantings set in rows 4 feet apart. **Price of Asparagus (except where noted), strong 2-year roots, 50cts. per 25, \$1.00 per 100, \$6.00 per 1000.**

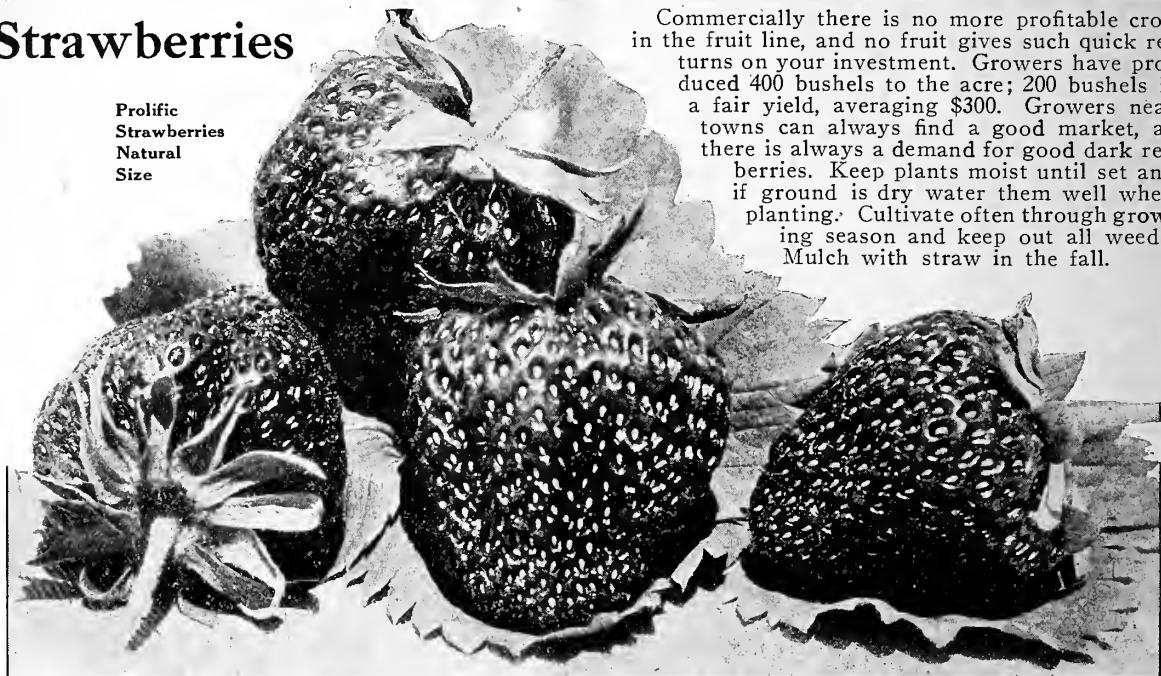

Conover's Colossal. A standard kind of first-class quality. Tender and high flavored; valuable market and garden sort.

Giant Argenteuil. A very early variety, producing heavy crops of the largest white stalks; it is very long-lived; holds its lead in all the largest Asparagus sections, as it makes a good show in market, and always brings the best prices of any Asparagus. 75 cts. per 25, \$2.00 per 100, \$10.00 per 1000.

Palmetto. This variety is extensively grown for market on account of earliness, large size and fine appearance.

Strawberries

Prolific
Strawberries
Natural
Size

Commercially there is no more profitable crop in the fruit line, and no fruit gives such quick returns on your investment. Growers have produced 400 bushels to the acre; 200 bushels is a fair yield, averaging \$300. Growers near towns can always find a good market, as there is always a demand for good dark red berries. Keep plants moist until set and if ground is dry water them well when planting. Cultivate often through growing season and keep out all weeds. Mulch with straw in the fall.

Our Strawberry Plants are from fresh, new, propagating beds. We do not sell from old fruiting beds. We propagate to throw all the vigor into the new plants, strong, robust, with thick, abundant roots and heavy crowns. Dug and shipped direct from the field; packed to arrive in any part of the country in fresh condition. Strawberries should always be sent by mail or express.

	25	100	1000
Price of Strawberries (if by mail add 25c per 100).....	\$0.50	\$1.00	\$5.00

Brandywine. Berries very large, regular, conical form; color bright glossy red; flesh firm and of excellent quality. Its large size, beauty of form and color, firmness and high quality will make it a desirable variety for any purpose.

In New York we know of a grower with 600 Brandywine Strawberry plants set on less than 1/10 acre that bore 12 bushels of fruit that sold for \$46.08.

Glen Mary. Berries large, bright deep red, rich, sweet and good. One of the most productive and holds its size well to the end. A fine keeper and shipping berry. Medium to late.

Monroe. A very hardy and strong growing variety with perfect blossoms. Fruit uniform in shape and size, extremely large and handsome. A deep red berry, very firm and fine grained, flesh red clear to the center and of superior flavor. A good shipper and brings top prices in all markets. 75 cts. per 25, \$2.00 per 100, \$10.00 per 1,000.

Prolific (New). Originated at New York State Experimental Station; considered by many so desirable a commercial variety that it is being planted extensively. Perfect blossom. Plants vigorous and very productive; have yielded at the rate of 14,502 quarts per acre. Fruit matures in mid-season, ripening period long; easily picked; berries very large, retaining size well as season advances. Color handsome, bright scarlet; flesh firm, well colored at center, juicy, pleasantly acid, aromatic; of good quality. On account of the vigor and productiveness of the plants and the attractiveness of the large, uniform,

well colored berries, Prolific is well worthy of commercial planting. Price: 60 cts. per 25, \$1.50 per 100, \$8.00 per 1,000.

Senator Dunlap. Season early to medium; popular market sort. It withstands all conditions of weather beyond the average. Very productive; dark red all through.

Everbearing Strawberries

Ever-bearing strawberries are no humbug; they have been proved a commercial success. They are entirely different in type from ordinary sorts. To make them bear good berries from August to the arrival of killing frosts the blossom-stalks should be removed in May and June. Berries are as good in flavor as any of the Summer-ripening sorts and give good yields. It will pay any fruit grower to plant a fair number of these plants. We offer the two best varieties that lead all others. Price \$1.00 per doz., \$5.00 per 100.

Progressive. Perfect blossom, strong, healthy foliage; fruits continuously, bears heavily on new runners the first summer and fall. Berry rather long, fine, dark red, good quality, extra sweet, firm and a good shipper. Well tested and uniformly recommended by Horticultural Societies everywhere.

Superb. Perfect blossom, thrifty grower, produces splendid fruit. Considered the best of the fall-bearing sorts. Each berry good shape, very large, rich dark red, glossy and attractive; finest flavor. Produces heavy crops.

Downing

Gooseberries

Gooseberries are rapidly growing in favor everywhere, with a firm and secure market, the demand constantly growing, more being preserved every year. The expense of cultivation is light and returns are most satisfactory. Good plants should produce 200 bushel per acre the third year after planting, and from 300 to 400 bushel the fifth year.

Price of Gooseberries (except where noted) strong 2-year

Each	12	100
\$0.15	\$1.50	\$8.00

Best Varieties

Chautauqua. Yields great crops of light yellow berries, free from spines and hair, veined and transparent; very sweet and delicious. Fruit largest size, 1 to 1½ inch in diameter. 25 cts. each, \$2.50 per doz.

Downing. The business gooseberry, excels all others in productiveness, hardiness, ease with which it is grown. Large size, roundish-oval, pale green covered with thin white bloom. Skin thin and smooth. Juicy, sprightly and sweet; ranks among the best in flavor and quality. Bush a strong grower, rarely troubled with mildew; very productive; will average 10 pounds of fruit per bush. Excellent for family use and will make you big profits for market.

Industry. Enormous size; dark red or cherry color, with numerous hairs; delicious when ripe. It has been fruited in this country for years with suc-

The Gooseberry thrives best on a cool, damp, rich soil. Set 4 feet apart each way and cultivate frequently. Should be mulched with manure each spring and well pruned so as to give the new wood a good chance.

cess, and is unequaled for size, flavor, productiveness and vigorous growth. 20 cts. each, \$2.00 per doz.

Pearl. Resembles the Downing, larger and superior in quality. Fruit pale green, fine for cooking or table use. Has been tested in all Experimental Stations throughout the U. S. and proved wonderfully productive. Very hardy; free from mildew.

Red Jacket (Josselyn). The best of the American sorts, as large as the largest English variety. Strong, vigorous grower, hardy, wonderful cropper. Berry rich, juicy, highest quality.

Victoria. This new gooseberry is a wonder. It is the strongest grower, the best cropper, and finest flavored of red gooseberries. It is superior to Industry in its growth, yielding larger crops of its delicious high flavored fruit, which is superb in quality, and ripens ahead of Industry. 25 cts. each, \$2.50 per doz.

Glen Morgan, W. Va., April 5, 1915.

Enclosed find order for trees, which I hope you will fill promptly. Trees I got from you last year are doing fine.

C. E. WILLIAMS.

Bristol, Pa., Aug. 31st, 1915.

The Trees I got from you last fall are all living and doing fine, both fruit and ornamental, as well as the Roses and Flowers, thanks to you for good stock.

WILMER E. HIBBS.

Keenan, W. Va., Jany. 19, 1915.

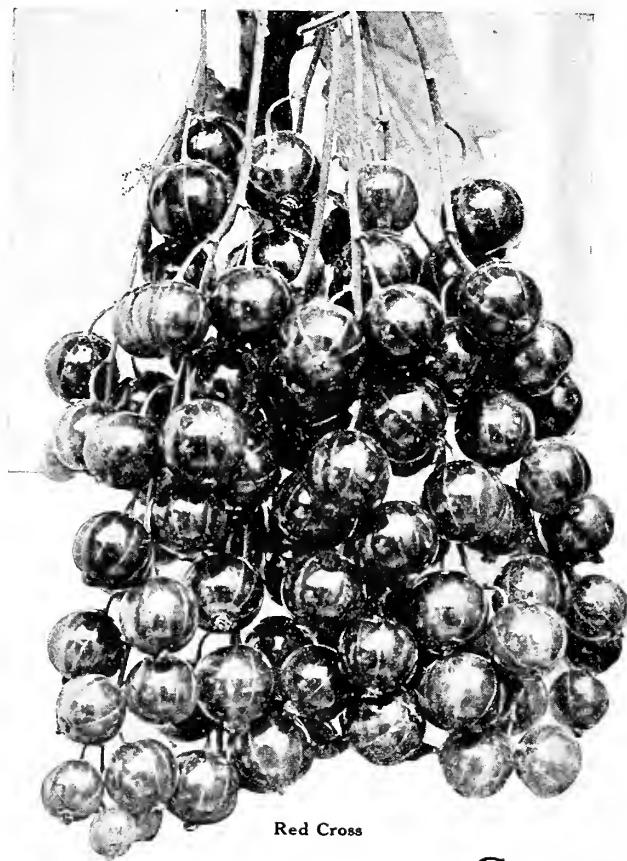

Last October I ordered 200 Strawberry plants from you, they arrived in fine condition, were the nicest plants I ever saw and so far are doing well; out of 200 I don't think there is a plant but what is living.

MRS. MAXWELL BLAND.

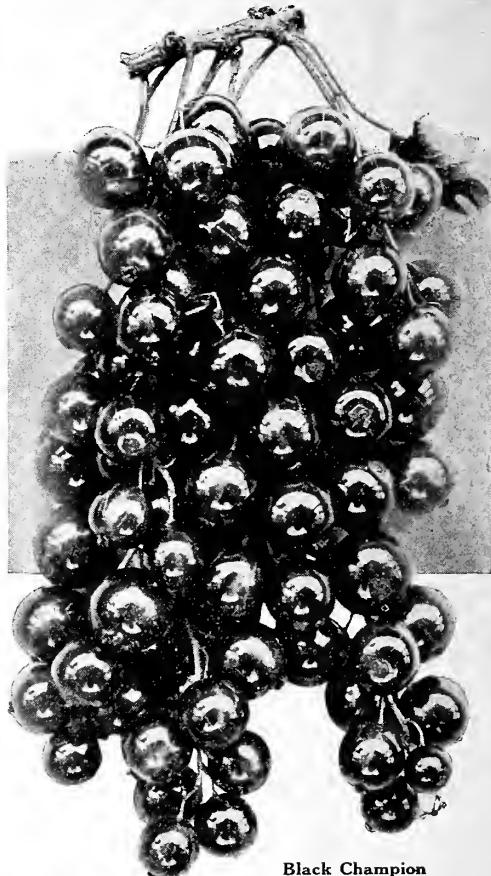

Schenectady, N. Y., Sept. 27, 1915.

I received fine goods and good treatment from you last spring.

DR. G. E. T. WARD.

Red Cross

Black Champion

Currants

One of the most pleasing and healthful of garden fruits; none easier of culture. Grow and bear well on any garden soil, but do best on heavier land.

Price of Currants (except where noted), strong 2-yr. plants

Each	12	100
\$0.10	\$1.00	\$6.00

Black Champion. An English variety of great value; very sweet and delicious; bushes thrifty, strong; berries very large; early, prolific, fine.

Cherry. The standard Red Currant. Fruit very large; a fine, upright grower; valuable alike for market and garden; splendid quality.

Fay's Prolific. One of the very best and most popular red currants. It is very productive, hardy and vigorous; it will average larger than Cherry; of the finest quality, and brings best prices on the market; fruit bunches 3 to 5 inches long; easily picked.

Perfection. A new variety of highest excellence and first commercial importance; one that every small-fruit grower should have. Originated at Rochester, N. Y., and awarded the Barry Gold Medal and other first prizes. Bush large, vigorous grower, hardy, very productive. Fruit matures in mid-season, picks easy, splendid keeper and shipper. In color the fruit is an attractive red, slightly lighter

Yield 200 bushels and over per acre and bring \$4.00 to \$5.00 per bushel. Do especially well planted in shade of trees, used as fillers in orchards. Set in rows 4 feet apart each way and cultivate frequently.

than Fays, and superior to it in flavor and quality; juicy, tender, sprightly sub-acid. Clusters long and compact; berries uniformly large to the tip of the cluster. The plants we offer are direct from the originator, with his label on every bush, thus insuring them to be genuine Perfection. 20 cents each, \$1.75 per dozen, \$12.00 per 100.

President Wilder. One of the strongest growers, extremely productive, fruit hangs on bushes longer than any other variety. Bunch and berry very large, attractive bright red color; desirable for table or market.

Red Cross. A strong growing variety. Cluster long; berry medium to large, bright red; quality good to best. It is exceedingly productive, and the currants are of large size. Further than this, the fruit is far sweeter than ordinary currants.

White Grape. Greatest of the white varieties. Delicious, mild, excellent quality; good for table use; very distinct and valuable. Immensely productive.

Golden Pocklington

Campbell's Early

Grapes

Every one should have a few grape vines in the home garden. A grape arbor of six or more vines will supply the needs of your family. They require very little cultivation and returns are quick and abundant. Can be trained over fences, trellises or doorways and thus be ornamental as well as useful. To grow for market they can be planted on hill sides that are unsuitable for other crops. Sunny exposure is desirable.

Prices of Grapes (except where noted) strong 2-year

Brighton (Red). Highest quality, sweet and delicious, large in bunch and berry, almost seedless. Hardy.

Campbell's Early. A new black grape, superior to Concord in many respects, larger in bunch and berry, much earlier, better quality. The most valuable early grape for market, tremendously in demand because of its early ripening and superior keeping and shipping qualities. Flesh firm, tender, separating easily from seeds. Flavor rich, sweet, slightly vinous, without acidity from skin to the center. A very strong, vigorous grower. 20cts. each, \$1.75 per 10, \$15.00 per 100.

Catawba. One of the best late keepers, lasts till February or March. Fine quality, largely used for wine and champagne. Large, coppery red berries, purplish when fully ripe.

Three thousand baskets per acre is a comparative common yield, while the most successful growers have had as much as 4,000 baskets per acre and cleared \$120.00 to \$150.00 per acre net profit.

The plants we offer are strong 2-year vines, and the following is a list of the best and leading varieties.

	Each	Doz.	100
.....	\$0.15	\$1.00	\$6.00

Concord (Black). The great business grape, most widely known and grown of all, and for all around goodness no variety equals the old Concord. Has brought growers more money than any other sort. Vines extremely hardy, vigorous and productive; bunches large, compact; berries large, juicy, buttery and sweet. Succeeds well most everywhere. \$4.00 per 100.

Delaware. A delicious little red table grape; juicy, sweet, hardy and productive.

Diamond. A delicious white grape of high quality, for which the demand is constantly increasing. Recommended for the home grape arbor and the commercial vineyard. Bears early in the season, vines hardy and very productive.

Grapes—continued

Concord

Niagara (White). A great yielder and of fine flavor; ripens early, clusters very solid; large vines.

Golden Pocklington. The great vigor and hardness of the vine with the beauty and size of the clusters, place this in the front rank of white grapes; berry a white lemon-yellow, tender, sweet and fine aromatic flavor, very prolific.

Salem (Red). Bunch medium, shouldered and compact, vine strong and vigorous, berry large, coppery red, thin skinned, sweet and sprightly; a good market berry; ripens in September.

Worden (Black). A seedling of the Concord; bunch large and compact, berry round, black with blue bloom; pulpy, juicy and very pleasant; ripens several days earlier than Concord.

Lionville, Pa., Nov. 1st, 1915.

The Old Glory Grape Collection I bought of you two years ago has done fine, beyond my expectations.

FRED. W. HOYLE.

Green Mountain. The first white grape to ripen, found growing in the Green Mountains of Vermont, where it ripens its fruit perfectly. Color greenish-white, skin thin, pulp exceedingly tender and sweet, containing but one or two seeds. Quality superb. 25cts. each, \$2.00 per 10, \$18.00 per 100.

Lucile. A new red grape, ahead of all others in vigorous growth, hardiness and productiveness. Recommended wherever extra hardy grapes are desired; never winter-kills, crops exceed Concord. Fruit keeps well, is good quality; clusters and berries are large, attractive in form and color. A steady and reliable money-maker, the beauty of the fruit will always sell it at extra high prices. 25 cts. each, \$2.00 per 10, \$18.00 per 100.

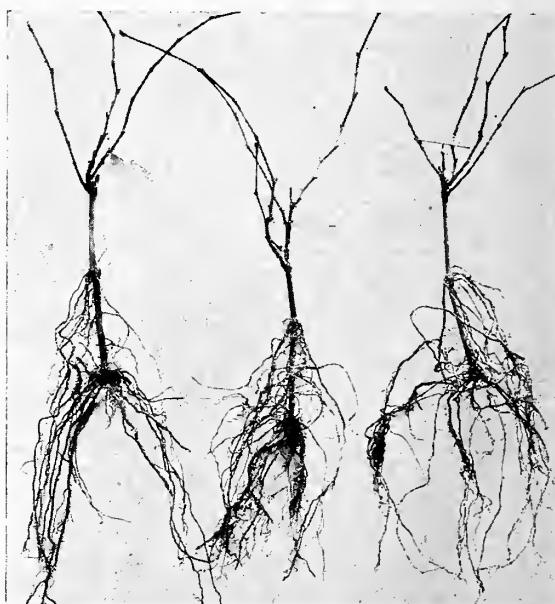

McPike. A seedling of the Worden; fully as vigorous, hardy and productive; ripening at same time. Bunch very large, compact, black with blue bloom; berries mammoth size, usually three inches in circumference. Has been well tested and easily takes first rank as the best large grape. 25 cts. each, \$2.00 per 10, \$15.00 per 100.

Moore's Early. Comes into market at least ten days before Concord, which means a lot of money in your pocket in growing grapes for profit. Vines extremely hardy, berries large, purplish-black, sweet and very good.

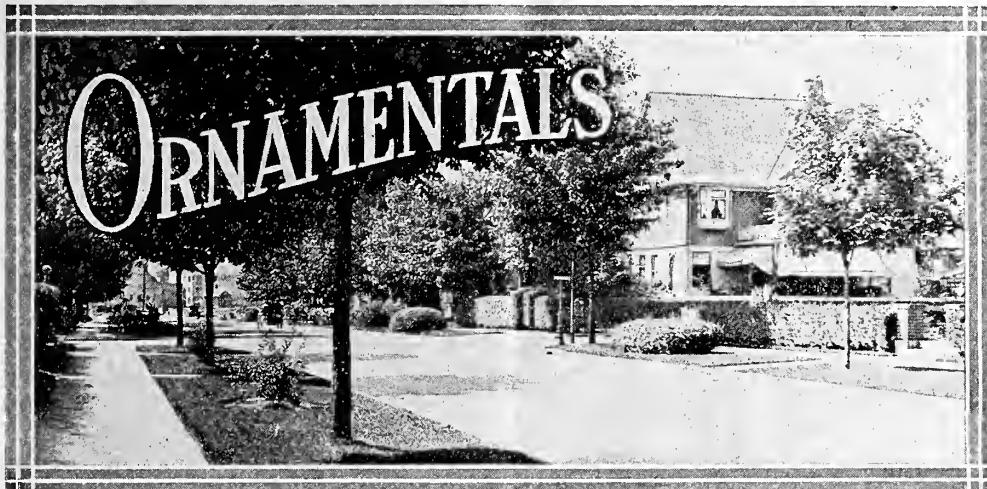

Chinchilla, Pa., Nov. 6th, 1915.

I received my order of Trees and Raspberries and was very much pleased with same. You can rest assured that anything I need in the nursery line I will know where to get good stock. Have recommended you to a number of my neighbors.

S. H. LANGHAM.

2-year Grapes—the kind we ship

Ornamental Department

Many people realize that well-kept and attractive grounds add to the beauty and comfort of the home and increase the value of their property. If the grounds surrounding the house are extensive, beautiful effects can be produced by planting shade trees, shrubs, vines and flowers according to some pre-arranged plan. Real estate owners who have vacant property to sell are beginning to plant vines, trees and shrubs, knowing that they can secure a larger percentage on their investment when the ground is

sold, as purchasers will pay more for a fine looking lot than one with unsightly surroundings. Most people realize the importance of getting started right. Buy none but the best stock, properly grown by reliable nurserymen who have given their best thought to the careful propagation of only the best varieties. We have a large stock of all kinds of shade trees, ornamental shrubs, etc., that has been selected with the greatest care and attention, both as to variety and quality.

How to Plant

Do not make the mistake of planting at random all over the grounds. Trees and the larger shrubs may be planted along a lane or avenue leading to the house, or dotted about the lawn on lines radiating from it. This will secure light, air and a good view from the house. Upright shrubs, roses and flowers should be planted in clumps. These beds should be well cultivated and the plants pruned annually. Mass the trees and beds on the boundaries

so as to leave a broad space for the lawn, and where there is a pretty view leave an opening. Where there is an unsightly object, conceal it by planting trees or climbing vines. Do not plant large trees near the house, except enough on the sunny side for shade.

Plant shrubs and small trees twice as thick as they should be when fully grown. This will make a good showing at once, and when growth of the plants has made them too thick, some should be taken out.

Trees for Special Purposes

For City Streets and Avenues—Sugar Maple, Norway Maple, American Elm, Pin Oak, American Linden, Oriental Plane, Catalpa Speciosa, Silver Maple, Ash Leaf Maple.

Rapid Growing Street Trees—Silver Maple, Ash Leaf Maple, Carolina Poplar, Catalpa Speciosa.

Best Lawn Trees—Norway Maple, Schwedler's Maple, Cut-leaf Weeping Birch, Catalpa Speciosa,

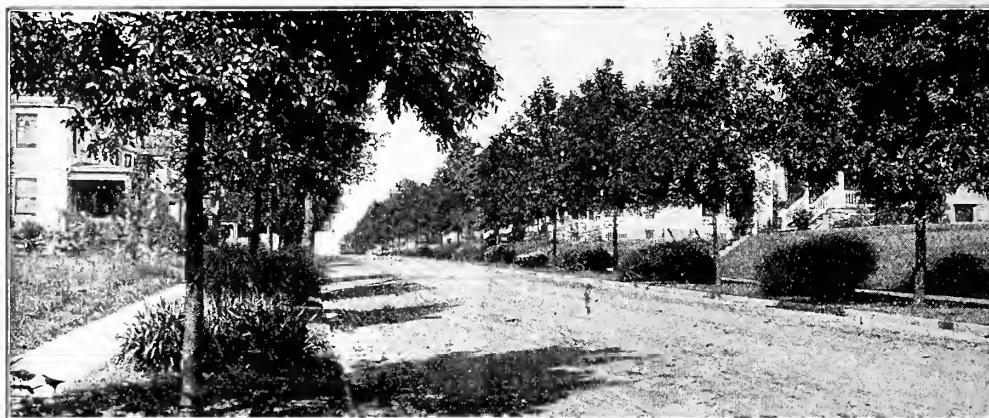

Purple-leaf Beech, Tulip Tree, Mountain Ash, the Oaks, English Elm, the Lindens.

Low Growing Lawn Trees—Japan Maple, Catalpa Bungeii, Japan Weeping and Flowering Cherries, Double Flowering Thorns, Magnolias, Weeping Mulberry, Bechtel's Flowering Crab.

Trees for Screens—Carolina and Lombardy Poplar, Golden Willow, Norway Spruce, Dogwood White.

Get Your Order in Early—Note our Cash Discount offer for early orders, also Free Premiums.

Don't fail to look over our SPECIAL COLLECTION OFFERS on pages 45 and 46.

Row of Norway Maples

Deciduous Trees

Birch—*Betula*

Birch, Cut-leaved Weeping. One of the most elegant of all weeping trees. Its tall, slender, yet vigorous growth, graceful, drooping habit, silvery white bark and delicately cut foliage present a combination of attractive characteristics rarely met in a single tree. 6 to 8 feet, \$1.00 each.

Beech—*Fagus*

Beech, Purple-leaved (Purpurea). A remarkable variety, with very dark purplish foliage, changing to crimson, and again in the fall to dark purplish green, making a striking contrast with the green of other trees. Highly ornamental and desirable. When fully grown, 40 to 50 feet high. 4 to 5 feet, \$1.00 each.

Catalpa

Bungei (Umbrella Catalpa). Grafted on stems six to eight feet high, it makes an umbrella-shaped top without pruning. Perfectly hardy, and flourishes in almost all soils and climates. Leaves large, glossy, heart-shaped, deep green; lie like shingles on a roof; always make a symmetrical head. One of the most unique trees; a valuable acquisition, desirable for lawn, park and cemetery planting. \$1.00 each.

Catalpa Speciosa. One of the most beautiful lawn or street trees, producing magnificent flowers early in spring; very rapid growing; beautiful. 8 to 10 feet, 50 cts. each.

Worcester, Mass.,
Jan. 11, 1915

I want to order some more trees. Those I got last spring made a wonderful growth; I did not lose one of them.

JOHN G. ENBERG.

Dogwood—*Cornus*

White Flowering (Florida). A fine American tree, growing from sixteen to twenty-five feet high. Foliage of a grayish green color; very glossy and handsome, turning in the autumn to a deep red, rendering the tree one of the most beautiful objects at that season. The flowers appear before the leaves in the spring and are about three inches in diameter; white and very showy. It is one of the most valuable ornamental trees. 75cts. each.

Red Flowering (Flore rubra). This merits all the favor which has been shown it by the public. The flowers are like *Cornus florida*, except that they are a deep rose-color, freely produced. A fit companion to the white form. \$1.25 each.

Barberry Thunbergii

Catalpa Bungeii

Deciduous Trees—continued

Crab, Bechtel's Double Flowering

Crab—*Pyrus*

Crab, Bechtel's Double-Flowered (American). Tree medium size, covered in early spring with beautiful double-pink fragrant flowers that look like roses at a distance. 4 to 5 feet, 75 cts. each.

Elm—*Ulmus*

Elm, American White. A noble drooping, spreading tree of our own woods; one of the grandest of park and street trees. 8 to 10 feet, 75 cts. each; 10 to 12 feet, \$1.00 each.

Elm, English. A native of Europe, forming a tall, erect tree, with slender branches and small leaves. When fully grown, forty to fifty feet high. 8 to 10 feet, \$1.00 each.

Horse Chestnut—*Aesculus*

Horse Chestnut. The well known species; has magnificent spikes of white flowers. 6 to 8 feet, 75 cts. each.

Linden or Lime—*Tilia*

Linden (American Basswood). A rapid growing, native tree, with very large leaves and fragrant flowers. 7 to 8 feet, 60 cts. each.

Linden, European. Fine pyramidal tree, smaller in all parts than the American Linden; more valuable for lawn planting. 7 to 8 feet, 75cts. each.

The Magnolias

Magnolia, *Conspicua*. A beautiful variety, with large white flowers that appear before the leaves. Tree of small size, very handsome. 4 to 5 feet, \$2.00 each.

Magnolia, *Lenne*. A very showy flower; cup-shaped; crimson purple outside and pearl colored within. One of the finest of the purple magnolias. 4 to 5 feet, \$2.00 each.

Magnolia, *Soulangeana*. Flowers white and purple; foliage large, glossy and massive; very profuse; hardy and one of the most desirable. 4 to 5 feet, \$2.00 each.

Maple—*Acer*

Maple, Ash-leaved. A fine rapid growing variety; very hardy and excellent for avenues. 6 to 8 feet, 50cts. each; 8 to 10 feet, 75 cts. each.

Maple, Japan-Bloodleaf. Of dwarf habit and rounded form; foliage five-lobed and serrated; reddish crimson in June. A charming variety and one of the best of the Japan Maples. 3 feet, \$1.50 each.

Maple, Norway. The most popular shade tree in America, the ideal tree for street, driveway or lawn, and for permanent worth in all landscape plantings there is no other tree in its class. Of fairly rapid growth, forming a dense, symmetrical, rounded head. Broad, deep green leaves which turn to bronze and gold in autumn. The tree is large, towering 50 feet high when fully grown. If room for only one shade tree plant a Norway Maple. 8 to 10 feet, 75 cts. each; 10 to 12 feet, \$1.00 each.

Maple, Schwedler's Purple. A beautiful variety with very large bronze-red leaves and young shoots of the same color; a vigorous grower and a most ornamental tree. 6 to 8 feet, \$1.00 each.

Maple, Japan-Bloodleaf

Deciduous Trees—continued

Maple—*Acer*—continued

Maple, Silverleaf, or Soft Maple. A large, fast growing tree, very attractive, should be included in every planting. In great demand where immediate shade is required. Succeeds in every soil, extremely valuable for hardiness. 8 to 10 feet, 50 cts. each; 10 to 12 feet, 75 cts. each.

Maple, Sugar or Rock. An excellent shade tree of large size. Foliage beautiful dark green which turns to red and yellow in autumn. Valuable for Streets, Parks or Lawn. 8 to 10 feet, \$1.00 each.

Maple, Weir's Cut-leaved. A variety with cut or dissected foliage; branches slender and drooping, almost as graceful as the cut-leaved birch. The foliage is silvery underneath. 8 to 10 feet, 75 cts. each.

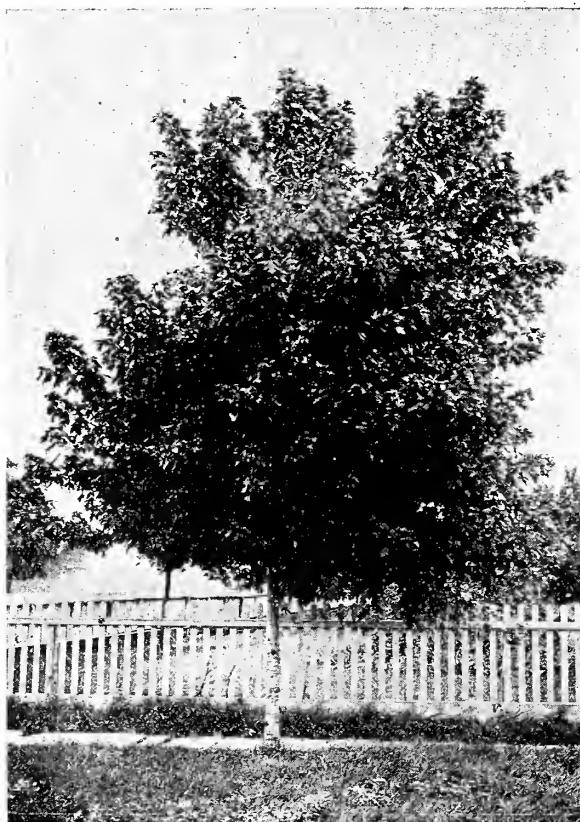

Mountain Ash—*Pyrus Sorbus*

Mountain Ash (European). A fine hardy tree; head dense and regular, covered from July till winter with great clusters of bright red berries. 7 to 8 feet, 50 cts. each.

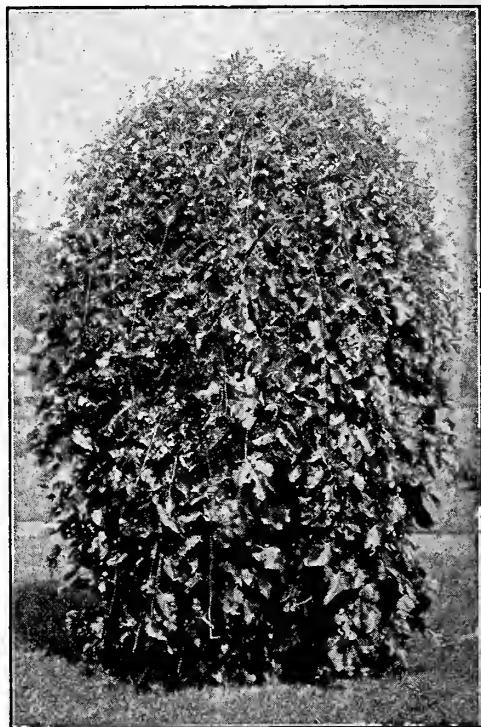

Reading, Pa., Feby. 27th, 1915.

The goods I got of you last year are doing fine, and am well pleased.

W. S. MILLER.

White or Silver-leafed Maple

Mulberry, Tea's Weeping

Mulberry—*Morus*

Mulberry Downing. A rapid growing, fine shade tree. Berries mild, pleasant and good quality. Bears at four to five years of age. Continues in fruit from July to September. 5 to 7 feet, 50 cts. each.

Mulberry, Tea's Weeping. Perfectly hardy, forming a natural umbrella-shaped top or head; foliage handsome; a fine ornament for the lawn. 6 to 7 feet, \$1.50 each.

Peach—*Persica*

Double White-flowered Peach. Very ornamental. Flowers pure white and double; superb. Perfectly hardy. 60 cts. each.

Double Rose-flowered Peach. Flowers double, pale rose-colored, like small roses. Very pretty. 60 cts. each.

Plane—*Platanus*

Oriental Plane (*Orientalis*). Leaves heart shaped at base, deeply cut. Is among our tallest trees, growing rapidly into massive proportions. Hardy and free from disease. It does well in cities and near the seashore and is not affected by insects. 8 to 10 feet, 75 cts. each.

South Akron, Ohio, May 29th, 1915.

My strawberries came in excellent condition. Am well pleased with them. It will be my pleasure to place all future orders with you.

THEO. E. LEY.

Deciduous Trees—continued

Plum—*Prunus*

Plum, Purple-leaf (Pissardi). Perfectly hardy. The leaves are rich purple, retaining their bright color through the entire season. Profusion of white blossoms in May, followed by small purplish-red edible fruit. 5 to 7 feet, 50 cts. each.

Double-flowered Plum (Triloba). Native of China. Flowers double, of a delicate pink, upwards of an inch in diameter, thickly set on the long, slender branches; flowers in May. 2 to 3 feet, 50cts. each.

Poplar—*Populus*

Poplar, Carolina. A native tree of rapid growth, with large, glossy leaves; valuable for park or street planting; a fine shade tree. 6 to 8 feet, 25 cts. each; 8 to 10 feet, 35 cts. each; 10 to 12 feet, 50 cts. each.

Poplar, Lombardy. Well known for its erect, rapid growth and commanding form. Very desirable in large grounds or along roads, to break the average height and forms of other trees. When fully grown, fifty to seventy-five feet. 6 to 8 feet, 35 cts. each; 8 to 10 feet, 50 cts. each.

Thorn—*Crataegus*

Thorn, Paul's Double Scarlet. Flowers deep crim-

son, with scarlet shade; very double. 4 to 5 feet, 60 cts. each.

Thorn, Double White. Has small, double white flowers. A highly ornamental variety, on account of both foliage and flowers. Makes a striking contrast when planted with the double scarlet. 4 to 5 feet, 60 cts. each.

Tulip—*Liriodendron*

Tulip Tree, or White Wood. One of our largest native trees, with large, glossy leaves, shaped like a violin and beautiful tulip-like flowers. Very desirable for planting on lawns, or where trees are desired for rapid growth. 6 to 8 feet, 50 cts.; 8 to 10 feet, 75 cts. each.

Willow—*Salix*

Willow, Babylonian (Weeping Willow). Tall, graceful and drooping; very beautiful. 6 to 8 feet, 50 cts. each.

Willow, Golden. A very showy variety, with golden bark of high color, very conspicuous in winter. Keep in bush form. 6 to 8 feet, 75 cts. each.

Evergreens

Arbor Vitae

American (Occidentalis). A well known variety of great value; it forms an upright conical tree of only medium size and is, all things considered, the finest evergreen for screens, being hardy and more easily transplanted. Grows rapidly, and with little care; or rather, by easy management, it soon forms a most beautiful hedge, very dense, and perfectly impervious to the sight. It is not adapted to turn stock but forms a most desirable and ornamental screen to divide the lawn from other parts of the ground, or for any similar purpose. 18 to 24 in., 25 cts. each, 10 for \$2.00, 100 for \$15.00; 2 to 3 feet, 35 cts. each, 10 for \$3.00, 100 for \$25.00.

Juniper—*Juniperus*

Irish. A very pretty little tree or shrub, forming a neat, tapering column of deep foliage; very hardy and desirable for planting on lawns, or in cemetery lots, where larger evergreens are not admissible. 2 feet, 50 cts. each.

Pine—*Pinus*

Austrian, or Black. From Central Europe, where it grows over one hundred feet high; remarkably robust, with long, stiff leaves and deep green foliage; hardy everywhere, and valuable for planting as windbreaks, screens, etc. 2 feet, 75 cts. each.

Scotch. A native of the British Isles. A fine, robust, rapid-growing tree, with stout, erect shoots, and silvery green foliage. Very hardy; valuable for shelter. 2 feet, 75 cts. each.

White Pine. A native American tree, valuable for timber and highly ornamental. Light, silvery foliage. Can be clipped like a shrub and used for hedges. Flourishes in the poorest sandy soil. 2 feet, 75 cts. each.

Koster's Blue Spruce

The Trees we sell are all first class quality.

Evergreens—continued

Spruce—*Picea*

Norway Spruce. The most generally used of evergreen trees. Useful for screens and wind-breaks on account of its rapid growth. It makes a tall tree, and as an individual tree, with room to develop, is of pyramidal, symmetrical growth, its lower branches sweeping the ground. 18 to 24 in., 25 cts. each; 10 for \$2.00; 100 for \$15.00. 2 to 3 feet, 35 cts. each; 10 for \$3.00; 100 for \$25.00.

Hedge Plants

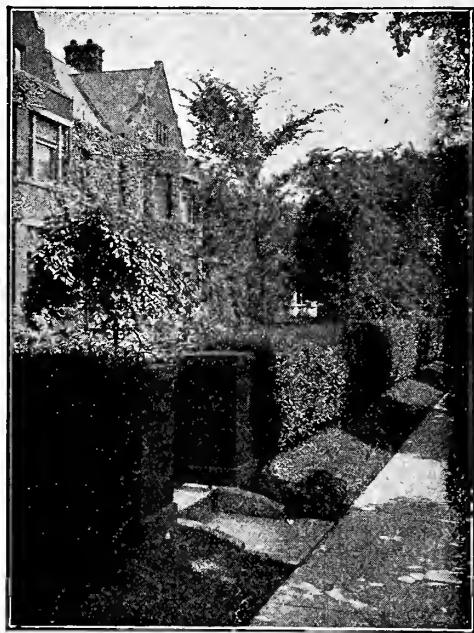

Barberry Thunbergii

Barberry Thunbergii. No other plant so fully meets every requirement for an ornamental hedge, combining beauty at all seasons, hardiness and compact growth. Brilliant green foliage in summer, taking on the most glowing colors from early Autumn until December, and after the leaves fall branches are loaded with scarlet-crimson berries which hang until March or April, presenting a most beautiful object. Hardy where Privet is not, never winter-kills, never gets thin at the bottom, the thickest and densest shrub at the bottom that we know of. One of the best to plant against the foundations of a house or in front of other taller growing shrubs to screen the stems at the bottom. Requires little or no trimming to keep in condition. 12 to 18 inches, \$9.00 per 100. 18 to 24 inches, \$12.00 per 100. Also American Arbor Vitae and Norway Spruce (see descriptions under Evergreens).

No money you can invest in planting will add so much to the appearance of your property as money spent to hide the foundation of your house, to make it look a home amid its surroundings. For this purpose low-growing shrubs such as Barberry, Spirea, etc., are most desirable.

Kosters Colorado Blue Spruce (*Picea Pungens* var. *Kosteriana*). A grafted variety of the Colorado Blue Spruce, the highest colored and most strikingly beautiful of all evergreens for the lawn. A perfectly shaped tree of compact growth with an abundance of foliage of the richest, silvery, glistening blue. It is difficult to form an idea of the beauty of this tree which is a triumph in evergreen growing. Very hardy. 18 to 24 in., \$2.00 each; 2½ to 3 feet, \$3.00 each.

California Privet

California Privet. One of the best for hedge purposes, remarkable for its beautiful, glossy-leaved, dark green foliage, and strong, rapid growth, permitting shearing to an extent that would ruin most plants. The most popular of all the half-evergreen hedge plants, a favorite everywhere. 12 to 18 inches, \$2.50 per 100; 18 to 24 inches, \$3.00 per 100; 2 to 3 feet, \$4.50 per 100.

New Berlinville, Pa., March 3rd, 1915.

You will receive an order for trees and vines from a friend of mine whom I have persuaded to buy of you, after showing him my trees bought of you two years ago. Hope you will favor him with nice trees.

ELMER R. BAUER.

Weigela—Rosea

Deciduous Shrubs

A good Shrub collection presents the greatest variety of color throughout the season, both in flower and foliage. Even in winter it is attractive in appearance from the gracefulness of its stems and branches and from the color of its bark. When right selections are made they serve almost as well as evergreens to shut out from view fences and other low, unsightly objects. If the grounds are small, a few shrubs such as Altheas, Hydrangeas, Spireas and other sorts can be used to good advantage. Vines trained over porches, trellises, fences, etc., can be made very effective at a small cost and give great comfort and satisfaction. Our shrubs are all healthy, hardy specimens, at least 2 years and more often 3 to 4 years old. They vary in size according to the thriftiness of the variety, but all have from 2 to 4 strong canes and will thrive anywhere with a reasonable amount of care and attention.

To assist our customers in making selections, we have made up a list of a few shrubs for special purposes.

For Shady Places, where large trees cause shade or buildings shut out the sunlight: Clethra, the Dogwoods, the Flowering Currants, Common Privet, Rhododendron, all Evergreen Shrubs.

Bright-Berried Shrubs, holding their fruit nearly all winter: The Barberries, the Viburnums, the Strawberries, Flowering Currants, Bush Honeysuckles.

Shrubs Grown in Standard Form: Altheas, Hydrangeas, Double Flowering Plum, Snowballs, Lilacs, Tree Roses in variety.

Each Doz.
Price of Shrubs (except where noted) . . . \$0.25 . . . \$2.50

Almond

Pink Double Flowered Almond (*Flore pleno Rosea*). A vigorous, beautiful tree, covered in May with rose-colored blossoms like small roses; hardy. 35 cts. each.

White Double Flowered Almond (*Flore pleno Alba*). Same as above except blossoms are pure white. 35 cts. each.

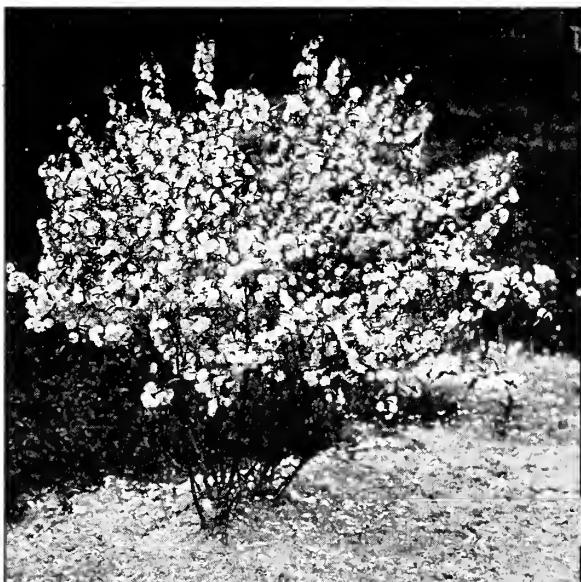

Azalea

Azalea Mollis. A beautiful species from Japan, with large flowers of fine shape, perfectly hardy. Colors: orange, yellow and carmine. 75 cts. each.

Berberis—The Barberries

Barberry, Purple-leaved. Foliage and fruit of a violet purple color, very striking; fine for single specimens; also desirable for ornamental hedges.

Barberry Thunbergii. (See description under Hedge Plants.)

Almond Double Flowering

Deciduous Shrubs—continued

Buddleia

Buddleia (Everblooming Butterfly Bush or Summer Lilac). A new and hardy shrub of vigorous growth. Flowers very sweet and fragrant, blooming in spikes 6 to 10 inches long, bright mauve-violet in color, closely resembling a lilac in general appearance. Excellent for cut-flowers. Continues to bloom abundantly all summer until frost comes. A single plant the first season will throw out as many as 50 flower spikes, which increase greatly in number during succeeding years. One of the finest flowering shrubs in cultivation. Price, strong 2-year plants, 35 cts. each.

Calycanthus—Sweet Shrub

Calycanthus (Sweet-scented Shrub). Very desirable; the wood is fragrant, foliage rich, flowers of a rare chocolate color, deliciously fragrant; blossoms in June and at intervals thereafter.

Caryopteris

Caryopteris, or Blue Spirea. A pretty autumn-blooming plant, producing clusters of beautiful blue fragrant flowers in great profusion from September until frost comes.

Clethra—White Alder

Clethra Alnifolia (Sweet Pepper Bush). Very hardy; blooms every season without fail; cold never harms it; flowers pure white, in spikes three to six inches long. A bed of Clethras will perfume the air for a long distance around. A neat, upright-growing shrub, worthy of a front place in every garden.

Buddleia—(Butterfly Bush or Summer Lilac)

Deutzia—Pride of Rochester

Well
named
"Pride"
of
Roch-
ester."
Excels
in
many
ways.

Cornus—Cornel or Dogwood

Cornus Elegantissima (Dogwood). A variety with dark green foliage, margined with silver and red; wood dark red. A beautiful and attractive free-flowering shrub. 50 cts. each.

Cornus Sanguinea (Crimson-bark Dogwood). The bright crimson hue of the smooth, glossy bark of this bushy plant renders it one of the most conspicuous deciduous shrubs in winter, a season of the year when a bit of color is much appreciated. Should be used freely in large shrubberies.

Deutzia—The Deutzias

Deutzia, Gracilis (Slender-branched Deutzia). A dwarf variety, covered with white flowers in June. Well adapted to planting in cemetery lots or small door yards; fine for pot culture. Flowers freely during the winter. First to flower. 35 cts. each.

Deutzia, Pride of Rochester. Very large double white flowers. It excels in size of flower, profuse bloom and vigorous growth; nearly a week earlier than Deutzia Crenata.

Deutzia Crenata. A very hardy shrub with luxuriant foliage and a profusion of double white flowers tinged with rose, produced in late June on long racemes; one of the most desirable in cultivation.

Deciduous Shrubs—continued

Diervilla—The Weigelas

Weigela, *Candida*. A strong, upright grower; flowers pure white, in great profusion in June.

Weigela, *Rosea*. A beautiful shrub bearing rose-colored flowers in May and June.

Weigela, *Variegated-leaved*. Of dwarf habit, and possessing clearly defined, silvery variegated leaves; flowers nearly white. It stands the sun well, and is one of the best dwarf variegated-leaved shrubs.

Weigela, *Eva Rathke*. A charming new variety; flower brilliant crimson; a beautiful, distinct, clear shade; flowers twice in one season. 35 cts. each.

Forsythia—Golden Bell

Forsythia, *Golden Bell* (*Fortunei*). A medium-sized shrub, drooping yellow flowers early in the spring before the leaves.

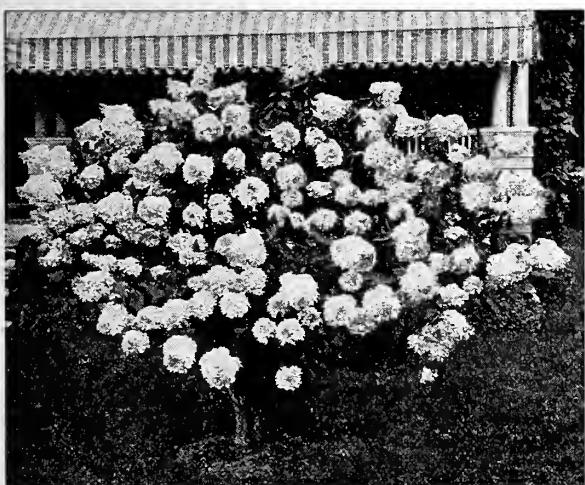

Hibiscus—Althea

Althea (Rose of Sharon). One of the most showy flowering shrubs; strong, erect growing, with large, bell-shaped flowers of striking colors, borne abundantly in August and September, when most other shrubs are out of bloom. Colors: white, red, rose, purple, blue and variegated. Single and double.

Althea (Tree Form). The Althea, as a shrub, is fine and attractive, but grown in tree form becomes doubly beautiful and interesting. It is hardy and of easy cultivation. Colors same as preceding. 50 cts. each.

Hydrangea—The Hydrangeas

Hydrangea *Arborescens Sterilis* (Hills of Snow). Grand, new ever-blooming Hydrangea, perfectly hardy, easy of culture. A magnificent shrub with enormous snow-white flowers, blooming from early summer until late in the fall. One of the most striking and beautiful of shrubs, adapted for single specimens, groups or hedges. A most profuse bloomer,

Hydrangea *Paniculata Grandiflora*

Weigela, *Eva Rathke*

a five year old bush has produced 126 perfect blossoms at one time. 50 cts. each.

Hydrangea *Paniculata Grandiflora*. Hardy in all sections of the country and very easy to grow. The flowers are immense, greenish-white when first open, changing to pure white and turning pink with age. Commences to flower in July and remains in flower until November.

Hydrangea P. G., Tree Form. Same as above but grown in tree form with single stem. Very fine and desirable. 50 cts. each.

Iris Germanica—German Iris

These are among the most desirable early spring flowering plants. Flowers are large and of the most exquisite coloring. Every garden and border should have a liberal planting of these beautiful plants, of which we have the following colors: Blue, lavender, maroon, purple, white and yellow. 15 cts. each.

Iris Kaempferi—Japan Iris

Flowers differ from the German Iris in being broad and flat. They exhibit a wonderful variety of colors and shades and appear later than the others. They rank among the most desirable of hardy plants; succeed best in a moist soil. 15 cts. each.

Kerria—Corchoris—Globe Flower

Kerria, *Japonica* (Globe Flower). A handsome bush with smooth green bark and orange yellow, double flowers, very pretty and desirable.

Deciduous Shrubs—continued

Lonicera—Bush Honeysuckle

Lonicera Tatarica rosea (Pink Tartarian Honeysuckle). Pink flowers that make a lovely contrast with the foliage; planted with the grandiflora, the two make a beautiful display.

Lonicera Tatarica var. *rubra* (Red Tartarian Honeysuckle). Blooms early in the spring; flowers a beautiful light red.

Lonicera Tatarica var. *alba* (White Tartarian Honeysuckle). Produces creamy white, fragrant flowers in May and June; form a high bush.

Paeonia—The Peonies

Fine hardy plants, rivaling the rose in perfection of bloom and coloring, and requiring little extra care, as they thrive well in any soil. Colors: Blush, crimson, purple, pink, red, variegated, white and yellow. 25 cts. each, \$2.50 per doz.

Paeonia, Fringe-leaved. Beautiful foliage in thread-like filaments; flowers very double, of dark, satiny, crimson color. Rare and exquisitely lovely. 35 cts. each, \$3.50 per doz.

Philadelphus—Mock Orange or Syringa

Syringa (Mock Orange) Golden-leaved. A plant of medium size with golden yellow foliage. It keeps its color the entire season; very sweet scented.

Phlox

Phlox, Hardy. Very fine, perfectly hardy; beautiful plants. Colors: Purple, lilac, white and pink. 15 cts. each.

Rhododendron

There is no more attractive feature of a fine country place than the rich bloom of Rhododendrons in the latter part of May and early June. The huge clusters of flowers in many shades of pink, violet, rose, purple, and delicate creamy white, give them right to the first rank among evergreen shrubs. The pride of every fine English home is a collection of these plants. But little labor is required to grow them. Their beauty pays for the labor. \$1.00 each: \$10.00 per doz.

Rhus—The Sumachs

Rhus Cotinus (Purple Fringe or Smoke Bush). A beautiful distinct shrub, with large bunches of feathery flowers which give the tree the appearance of being covered with a cloud of smoke. 35 cts. each.

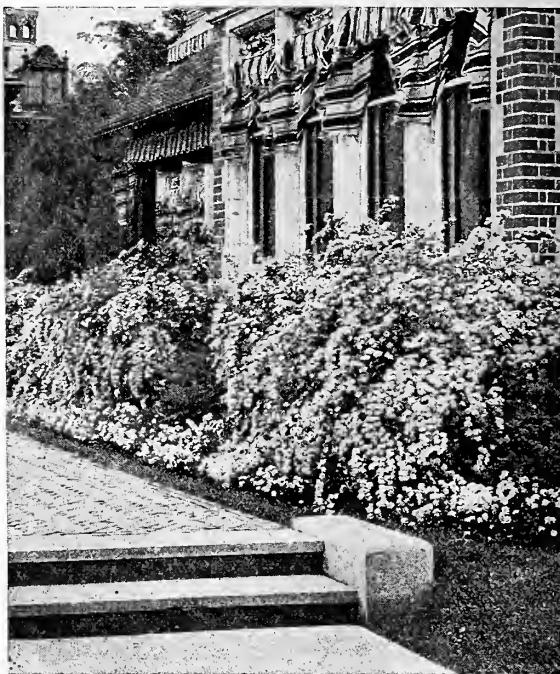

Ribes—Currant

Ribes aureum (Yellow-flowering). A native species with yellow flowers.

Ribes Sanguineum (Crimson-flowering Currant). Carmine flowers of fine color, with handsome leaves.

Sambucus—Elder

Elder, Golden (*Sambucus Aurea*). A beautiful shrub, with golden-green foliage when planted in the sun. Very valuable. White blossoms followed by handsome berries.

Spirea Van Houttei

Spiraea—Meadowsweet

Spiraea, Anthony Waterer. A new dwarf flowered variety. 15 to 18 inches high; crimson flowers. Perfectly hardy. Blooms all season. 35 cts. each.

Spiraea Billardi. Fine foliage, with spikes of red colored flowers during summer and fall.

Spiraea Prunifolia (Bridal Wreath). A superb old-fashioned variety, with graceful, upright, slender branches covered with a wreath of white flowers in May. The leaves turn to a beautiful orange color in the fall.

Spiraea Thunbergii. Of dwarf habit, and rounded, graceful form; branches slender and somewhat drooping; foliage narrow and yellowish green; flowers small, white, appearing early in spring, being one of the first spiraeas to flower. Desirable on account of its neat, graceful habit. Forges well in winter.

Spiraea Van Houttei. Without doubt the grandest of all the Spireas; beautiful at any season, but when in bloom is a complete fountain of white flowers, the foliage hardly showing. Perfectly hardy and an early bloomer.

Symporicarpos—Snowberry

Symporicarpos Vulgaris (Coral Berry). A slender branched, upright shrub, valuable for planting in shady places, as the foliage is very persistent; the fruit is a purplish red and hangs on well into winter; flowers small and rose colored.

Symporicarpos Racemosus. Same as the above except the berries are a pure, snow white; flowers rose colored, but larger.

Deciduous Shrubs—continued

WHAT A FEW TREES AND SHRUBS WILL DO

Syringa—The Lilacs

Lilac, Purple. Bluish-purple flowers, standard variety; always good. 25 cts. each.

Lilac, White. Cream colored flowers; very fine. 25 cts. each.

Lilac, Chas. X. Large shining leaves; flowers large, single, reddish-purple. 50 cts. each.

Lilac, Lemoine. A choice variety bearing large clusters of double white flowers. 50 cts. each.

Lilac, Ludwig Spaeth. New and believed to be the finest of the class. Color, purplish-red. 50 cts. each.

Lilac, Pres. Grevy. Very large blue flowers; largest of all. 50 cts. each.

Tamarix

Tamarix, Africana. A beautiful shrub of strong, slender growth, with light feathery foliage. Blooms in May; flowers warm shades of pink and red, delicately fringed. Invaluable for sea-side planting. 35 cts. each.

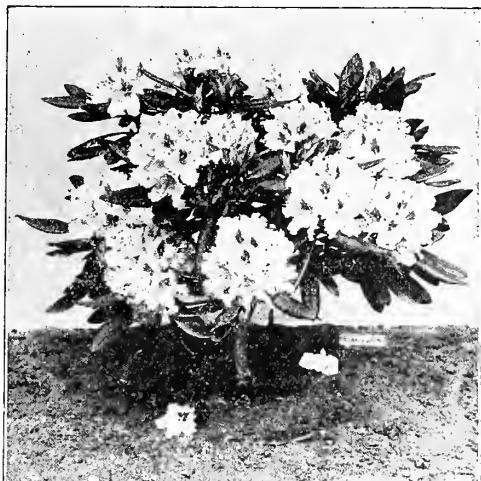

Viburnum—Arrow-wood—Snowball

Handsome hardy shrubs with showy flowers and foliage. Attractive when in flower, and many species produce large and profuse clusters of bright, glistening berries, and the foliage frequently assumes brilliant and intense color tones in autumn. As specimen plants, they have few rivals, and for grouping or massing, they make possible many charming effects. The species described below thrive best in moist soils in sunny situations.

Viburnum plicatum (Japan Snowball). An erect, compact shrub, blooming in June, the plants being completely covered with large balls of flowers as white as snow. Its dark, plicated foliage and massive clusters of bloom, which appear early in summer, are not equalled by any other shrub. 35 cts. each.

Viburnum opulus sterilis (Snowball, or Guelder Rose). A grand hardy shrub with handsome showy flowers produced in large, globular clusters. All of the flowers are sterile and radiant, and appear in numerous compact balls in spring. An old-time favorite, and without doubt one of the best of flowering shrubs.

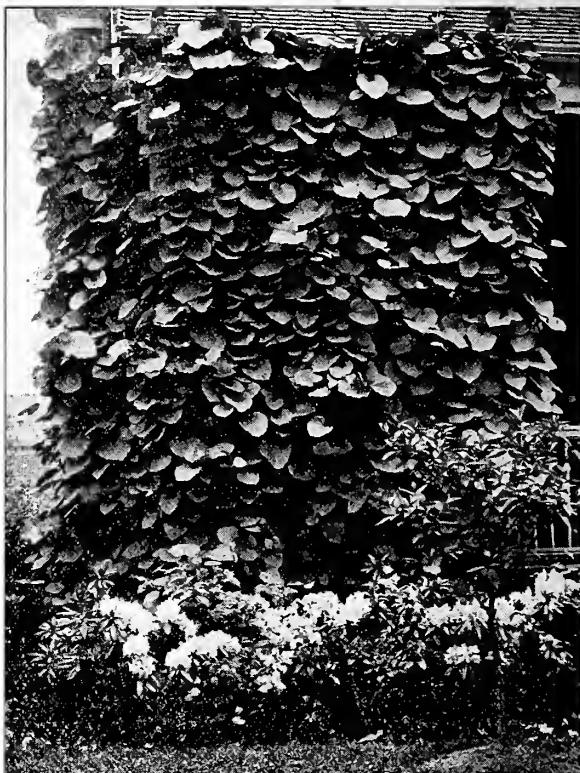

Viburnum opulus (High Bush Cranberry). A tall shrub with upright spreading branches, 8 to 10 feet tall, widely distributed in the northern hemisphere. Leaves broadly ovate, 3-lobed, bright green. Flowers white, disposed in flat-topped clusters in late spring and early summer. Berries scarlet, persisting in winter, very showy. 35 cts. each.

Rhododendron

Clematis—Henryii

Dutchman's Pipe Vine with Rhododendrons

Climbing Vines

Clematis

As a climbing vine clematis has no equal. Its great rich masses of flowers and rapid growth combine to make it the most desirable flower for verandas, screens, walls, arbors, etc. It requires good, deep, sandy loam, well enriched.

Henryii. Single. The finest white clematis. Very large fine flowers; grows rapidly. Blooms freely during summer and autumn. 35 cts. each.

Jackmanni. Single. Very large; deep purple; forms a perfect mass of the richest bloom; rapid grower and the very best purple sort. 35 cts. each.

Mad. Ed. Andre. Flowers medium size, deep crimson-red; velvety; very free flowering; continuing during summer. Distinct and fine. 35 cts. each.

Paniculata. Single. White, of extremely rapid growth, with dark, shining green foliage and a profusion of flowers which are small, but borne in large panicles. Very popular. 25 cts. each.

Ramona. This magnificent new clematis is an American seedling, extremely hardy. The Ramona is a strong, rampant grower, fully three times as strong as the Jackmanni, often growing ten or twelve feet the first season. It is a perpetual bloomer, giving an abundance of flowers through the season. In color it is a very deep sky-blue, distinct from any other kind, and very attractive. 50 cts. each.

Ampelopsis—Woodbine

Ampelopsis Veitchii (Boston Ivy). For covering buildings of brick or stone; for churches, walls, etc.; requires no support, clings tightly to the smoothest surface. Bright green leaves changing to brilliant colorings in autumn. It has no equal. 25 cts. each.

Aristolochia—Pipe Vine

Aristolochia siphon (Dutchman's Pipe). A magnificent hardy vine of rapid growth with very large heart-shaped leaves and brownish flowers, resembling a miniature pipe; splendid for archways or verandas. 35 cts. each.

Lonicera—Honeysuckle

Lonicera var. Halliana (Hall's Japan). Almost evergreen, with pure white flowers, turning to yellow; very fragrant; vigorous, covered with flowers from July to December, 25 cts. each.

Wisteria

Wistaria, Chinese Purple. One must see this plant in bloom to appreciate its magnificence. Perfectly hardy; it flowers in spring in long, drooping racemes; very beautiful. 35 cts. each.

Chinese White Wistaria. Same as the Chinese Purple except the flowers are pure white; very beautiful variety. 50 cts. each.

Frau Karl Druschki.

Roses

The demand is increasing each year for **Extra Heavy Roses for Immediate Effect.** The Roses that we offer are extra strong 2 year plants that will grow for you and produce an abundance of beautiful blooms the first summer. They are grown in **America**, for **American Homes and Gardens**, and are far ahead of the cheap budded roses imported from Europe by some catalogue houses, department

stores, etc. Our Roses increase in size each year, are permanent, produce finer and better blooms each year, and are the only roses suitable for the varying climates of this country. It is now possible for any one to have roses all summer, even with but a small garden, and we will gladly aid you in a selection of hardy varieties that will bloom from Spring until November.

Cultural Directions

Location. The best position for Roses is a southeast to southwest exposure. Roses require sunshine. They should be kept from shade and the roots of trees.

Soil. Roses do well in any good, garden soil. Avoid sand, too much clay, or ground which is stagnant. Be sure that the bed is well drained. Enrich with decomposed stable manure; cow-manure is preferable. Work this well into the soil, do not put any clear manure in the holes with the plants.

Planting. The planting of Roses may be done in October, early November, or in April and May. Dig a good, large, deep hole. Spread the roots out as much as possible, and when the hole is nearly filled tread the soil firmly with the foot.

Watering and Mulching. When the planting is finished a good soaking with water will prove beneficial, should the ground be dry; then mulch well with coarse manure and nature will do the rest. Water freely in dry weather only, and then in Early Morning or Late Afternoon.

Pruning. All Roses should be cut back from 1/3 to 1/2 when planted.

Cultivation. Roses need good cultivation. They like to have the soil stirred frequently.

Rose Insects and Remedies. For the leaf-roller or slug appearing as the second or third leaf is formed, Hellebore dusted on the leaves once or twice will usually suffice. For green aphis, white thrip or hopper, regular syringing with water-hose is the best treatment you can apply. For Rose Bugs a handpicking is the only effectual remedy. These are the most destructive rose pests to contend with.

Winter Protection. All Roses give better results if protected in winter. The best method is to bank the plants with earth as high as possible and cover with stable manure. Remove coarse litter in the early spring and pull earth away from plants before pruning, cutting out old wood and leaving 3 to 6 of the strongest shoots of last year's growth, cutting these back to within 8 to 12 inches of the ground.

Mt. Vernon, Ohio, April 30th, 1915.

Trees are at the express office, haven't seen them yet but I know they are all O. K., as everything I have ever bought of you yet has been as you have represented and entirely satisfactory.

DR. E. C. BEGGS.

New Washington, Ohio, Feby. 23, 1915.

I wish to state that trees received from you two years ago are looking fine.

H. K. PUGH.

Stevensville, Pa., May 1, 1915.

Trees and plants arrived in fine condition and a nice, straight lot; am very much pleased with them.

W. B. STEVENS.

Jany. 17th, 1915, Uniontown, Pa.

Last fall I saw some fruit trees which Mr. Black, of the Citizens' Bank, received from you and they looked nice. Send me your catalogue.

A. W. DISE.

Best Hardy Hybrid Perpetual or June Roses

Gloire Lyonnaise

Our Hardy Hybrid Perpetual Roses will succeed in any locality and are among the most valuable of all hardy plants. They are of vigorous, upright growth, have large, bold flowers, beautiful and highly fragrant. The varieties described below have been selected by us as the very best sorts, combining a wide range of color, form, freedom of bloom, fragrance and hardiness. You cannot plant any more desirable kinds. Price 25 cts. each; any 6 for \$1.35, or 12 for \$2.50.

Anna de Diesbach. Lovely shell-pink. Finely formed, compact flowers, full and double, delightfully fragrant. Vigorous grower and fine bloomer.

Baron de Bonstetten. A beautiful shade of dark red, shading to velvety-maroon. Large flowers, very double and full, highly scented. A free bloomer, one of the leading dark roses.

Clio. Flowers large, of fine, globular form, flesh color, shaded in center with rosy pink. Growth vigorous, handsome foliage. One of the finest new roses.

Frau Karl Druschki. This is the ideal hardy white rose; pure in color, perfect in form; strong grower and remarkably free flowering. Superb in every way.

General Jacqueminot. Brilliant scarlet-crimson. An old favorite and one of the best known roses in cultivation. Does well everywhere.

Gloire Lyonnaise. Brilliant white rose of more than ordinary worth. Blooms in greatest profusion like the best of the H. T. Roses; large, pointed buds, massive flowers, full and double. Color rich, creamy white, to pale salmon-yellow in open flower. Absolutely hardy everywhere.

Heinrich Munsch (Pink Frau Karl Druschki). Flowers large and perfect in form, on fine long stems. Clear, soft pink.

J. B. Clark. A new Gold Medal Rose which has created a sensation throughout the United States and Europe. Intense deep scarlet, shaded blackish-crimson. Flowers extraordinary in size, full and double, wonderfully fragrant. A remarkably free bloomer, robust and vigorous in growth, hardy even in Canada.

March. Londonderry. Ivory white; large, shell-shaped petals of great substance. Highly perfumed. Vigorous grower.

Margaret Dickson. Magnificent in form, very large; pure waxy white. Petals very large and of great substance. A strong, vigorous grower, free bloomer, should be in every selection.

Marshall P. Wilder. Deep, rich, glowing red; extra large, semi-globular and full. A very strong grower and free bloomer.

Mrs. John Laing. Soft pink. Beautiful form, exceedingly fragrant and remarkably free-flowering. Always does well and stands very close to the top among fine roses.

Mrs. R. G. S. Crawford. Deep, rosy pink: flowers large, full and of perfect form, highly fragrant; blooms most freely.

Paul Neyron. Largest of all rose blooms. Bright, shining pink, clear and beautiful; very double and full; finely scented. Vigorous grower and blooms all summer.

Prince Camille de Rohan. Universally known as the "Black Rose," owing to its very deep velvety crimson color, passing to intense maroon, and shaded black.

Ulrich Brunner. Bright cherry-red; flowers large and full. A good, strong grower and always does well.

J. B. Clark

Ten Superb Everblooming Roses

This collection embraces the choicest of the Ever-blooming H. T. Roses, including new and rare varieties of real merit, which have been thoroughly tested. We especially recommend this collection to those wishing constant bloom for cutting through the summer and autumn months. 35 cts. each. This set of 10 unsurpassed varieties for \$3.00.

Bessie Brown. A rose of Transcendent Beauty, totally distinct. Blooms perfectly formed, of immense size and substance, white, flushed with pink toward center, very highly perfumed. A profuse bloomer, hardy and vigorous, one of the finest roses ever raised.

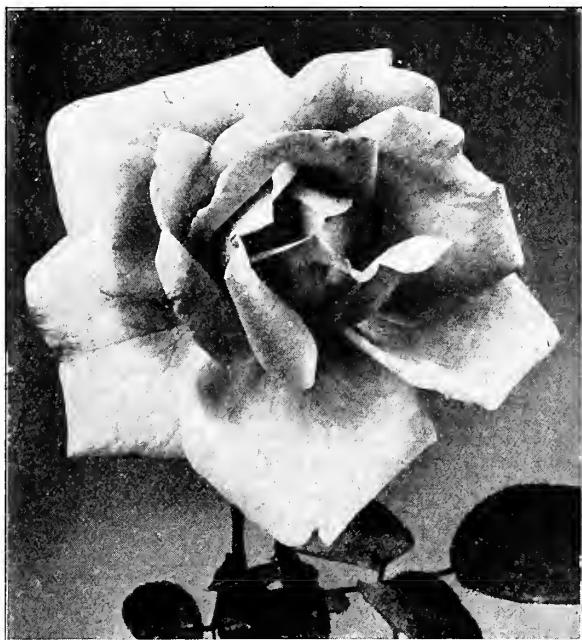

Betty. A wonderful rose, the greatest novelty of the past decade. Same type as Killarney, a unique color, ruddy gold (coppery rose overspread with golden yellow). Blossoms extremely large, fairly full, of glorious form and deliciously perfumed. Charming in color and form.

Etoile de France. One of the best and sweetest of its color. Brilliant, clear red-crimson velvet, centering to vivid cerise. Large flowers on long stems. Beautiful bronze-green foliage. Remarkably vigorous, free-blooming and hardy.

Gruss an Teplitz. Color of richest scarlet, shading to velvety crimson. Sweetly fragrant. Hardy in all sections and blooms constantly.

Juliet (Old Gold). Vivid reddish orange with coppery-red and apricot shadings. Continuous flowering, good grower, mildew proof foliage. A free and delightful garden rose, sweetly scented.

Kaiserin Augusta Victoria. Delicate creamy white, large pointed buds, splendid double blooms, full and fragrant. Strong, sturdy grower, absolutely hardy, blooms from early spring till late frost.

Richmond

Madame Abel Chatenay. A rare and very beautiful rose of novel and distinct coloring; rosy carmine with darker shades. Wonderfully beautiful flowers, full, deep, double and very fragrant. A very hardy rose, strong grower and very free bloomer.

Madame Caroline Testout. A remarkably beautiful rose, thoroughly hardy, a most profuse bloomer. Brilliant satiny-rose color, deepening at the center and bordered with silvery-rose. Large, exquisite buds; extremely large, full and double flowers, very sweet. One of the best.

Pink Maman Cochet. The Queen of all pink garden roses. Buds large, full and firm, elegantly pointed. Superb in the open flower, perfectly double, extra large blossoms of clear, rich pink changing to silvery rose. Hardy in every section.

Richmond. Superb in form and fragrance of flower. A rival of American Beauty, more dazzling in appearance. Scarlet-crimson of most brilliant hue. Long pointed buds, immense flowers borne on long, stiff stems. Wonderfully free blooming.

Etoile de France

Ogdensburg, N. Y., May 13th, 1915.
I received your strawberry and raspberry plants yesterday. Strawberry plants are the finest I ever saw.

EDWARD J. MORLEY.

Ansonia, Conn., Feby. 23rd, 1915.
Was very much pleased with the treatment received from you last year and if I can turn any business your way will do so.

HY. D. JUDSON.

Six Magnificent New Everblooming Roses

The latest introductions, thoroughly tested, wonderfully beautiful, exceedingly valuable and of distinct merit. 40c each; 6 for \$2.25.

My Maryland

My Maryland. Handsome in bud and flower, a rival of Killarney. Its brilliant, glowing, intense pink color and beauty of form are without a superior. Long, pointed buds; superb, large, full and double flowers of exquisite fragrance, delightfully and heavily perfumed. One of the strongest in growth, freest in bloom, extremely hardy.

Rhea Reid. A magnificent new rose, large as American Beauty, red as Richmond, and double as LaFrance. Vivid scarlet-crimson. Flowers marvels of beauty, large and bold; fragrant. A strong, rapid grower and continuous bloomer.

Lambertville, N. J., Feby. 9, 1915.

I would like to get a few trees this spring. The ones I got from you are doing fine.

CHAS. F. CHAPPLE.

Cranbury, N. J., Feby. 8th, 1915.

I want to purchase some shrubs and trees and a friend of mine wants one of your catalogues. Last summer he saw the nice trees that I got from you.

JOS. C. DOWGIN.

Montville, N. J., April 24th, 1915.

Order duly received in first class condition.

J. E. NORWOOD.

Dean Hole. A variety of great excellence, bound to rank with the best. Absolutely distinct and unique in coloring, gorgeous silvery-carmine rose with salmon shadings. Buds of extraordinary length, opening into mammoth blooms of fine form and great substance. A profuse bloomer, stout grower, very hardy.

Jonkheer J. L. Mock. A Giant Pink Rose of the LaFrance type; has created a sensation wherever grown. Clear, imperial pink; buds and blossoms of magnificent size and form, very fragrant, produced with greatest freedom and profusion. Of distinctive merit. One of the strongest growers of the H. T. Class.

Lady Hillingdon. A strikingly decorative rose, one of the latest introductions, awarded the Gold Medal of the National Rose Society. Color beautiful beyond description; deep apricot-yellow, shaded to orange, becoming more intense toward the center. Beautiful, long, pointed buds. A strong grower and very free flowering.

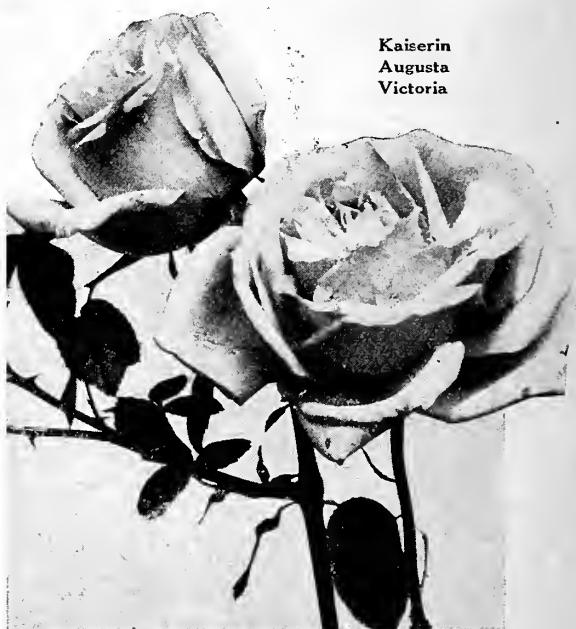

Madame Jules Grolez (Red Kaiserin Augusta Victoria). Regarded as one of the best New Roses, of highest class and unquestioned merit. Color a distinct and charming shade of cherry-red. Flowers very large, full and finely formed. Exceedingly free bloomer and remarkably strong grower.

Irwin, Pa., April 28th, 1915.

Forward me at once 2 Catalpa Bungeii. I saw the two Mr. Andersen received, who lives alongside of me. Please send me two nice ones.

W. H. RAMSEY.

Orange Killarney

Lady Hillingdon

The Lovely Killarney Roses

35c each; 3 for \$1.00

White Killarney. One of the most exquisite pure white roses. Long, full buds, handsome in shape; full open flower beautiful in form and texture.

Killarney. Brilliant sparkling pink. Large pointed buds, broad, wax-like petals with silvery edges; enormous semi-full flowers of exceeding beauty. Strong, upright grower and unusually hardy.

Duchess of Wellington (Orange Killarney). An admirable new rose, intense, saffron-yellow stained with deep crimson, deepening with the opening of the flower to a coppery-yellow of a distinctly new shade.

Miscellaneous Roses

American Beauty. The world-famous rose. Rich red, delicately veined and shaded, large and very double, with a delightful fragrance. 35 cts. each.

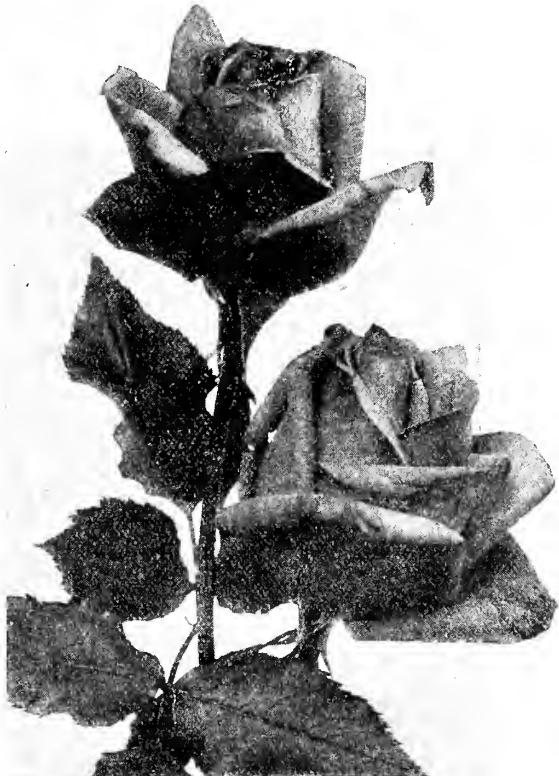

Baby Rambler Crimson. A dwarf variety of the Crimson Rambler, hardy everywhere, very popular. Blooms in profuse clusters until frost. 25 cts. each.

Katherine Zeimet (White Baby Rambler). Pure white flowers in large clusters. Very free blooming, one of the best. 35 cts. each.

Rosa Rugosa (var. Rubra). A Japanese variety with flowers of a beautiful bright rose-crimson, single, and succeeded by large berries of rich rosy-red. A good hedge rose. Very ornamental. 25 cts. each.

Rosa Rugosa Alba. Identical with the preceding, but flowers are white, and produces yellow berries. 25 cts. each.

Soliel d'Or. A color peculiar to itself. Gold and orange, to reddish gold. 35 cts. each.

Rhea Reid

Oswego, N.Y., Nov. 2, 1914
 Your trees, roses, etc., arrived all right. They look fine, MASON H. PLACE

New Climbing American Beauty

Thousand Beauties

Hardy Climbing Roses

25 cts. each, except where noted

New Climbing American Beauty Rose

A new and wonderfully beautiful rose, a cross between an unnamed seedling and the grand old American Beauty. Color rosy crimson, same exquisite fragrance as its pollen parent. Flowers 3 to 4 inches in diameter, finely formed on long stems and produced in great profusion. Over nine hundred blossoms and buds have been counted on one four-year-old bush. One of the first to bloom in spring and will continue to bloom until frost comes. Can be trained to trellises and porches but is unequalled as a pillar rose and grows magnificently in bush form. A worthy ornament to any garden and no lover of roses should fail to plant the New Climbing American Beauty. Strong 2 year plants, 50 cts. each.

Baltimore Belle. White, tinged with blush; very double; flowers in clusters.

Dorothy Perkins. Color shell-pink; pointed buds; flowers borne in clusters; very double, with beautiful, crinkled buds. The only sweet-scented Rambler Rose.

White Dorothy Perkins. Pure white, a valuable addition to the hardy climbing roses. Identical in foliage and habit with the Dorothy Perkins.

Flower of Fairfield (Everblooming Crimson Rambler). A sport or offspring of the popular Crimson Rambler. It surpasses any other rose for brilliancy of display. Blooming in the early spring, it continues until well along in the autumn, bearing large,

brilliant crimson clusters of flowers with the greatest freedom. 35 cts. each.

Crimson Rambler. Flowers a rich, glowing crimson, bright and clear, and remain on the plant in perfect condition, with their freshness and beauty unimpaired for more than two weeks. They are borne in immense clusters. Entirely hardy. Awarded three gold medals.

Yellow Rambler. A hardy climber, double golden-yellow flowers in large clusters.

White Rambler. Flowers are pure white, very double and remain on the vine a long time.

Tausendschon (Thousand Beauties). New. Imagine a luxuriant climbing rose literally covered with thousands of bright blossoms, borne in clusters and quite double. Colors of every imaginable shade, from white to deep pink. A hardy, vigorous grower with few thorns and handsome foliage. 35 cts. each.

TREE ROSES

Tree Roses 75 cts. each; 3 for \$2.00, except Baby Rambler. **Baby Rambler Tree Rose**, \$1.00 each, 3 for \$2.75.

The Tree Roses are grafted on hardy rose canes four to five feet high, are tree-shaped, and when in bloom are objects of beauty, making handsome plants for the lawn. We can supply White, Red, Pink, Yellow and Crimson, named varieties, and also Crimson Rambler and Baby Rambler. Extra fine strong trees that will bloom the first year.

A Few of the Many Hundreds of Testimonials We Receive Each Season from Practically Every State in the Union

Our Trees Have Strength and Vitality and Will Live and Grow

Newburgh, N. Y., May 12th, 1915.

The Raspberry Plants received over a week ago in good condition. Have them all planted and I think every one of them is growing, too.

CYRUS B. HULSE.

Mt. Kisco, N. Y., April 15, 1914.

Trees arrived O. K. Well worth the money paid.

F. J. CARPENTER.

Knoxville, Maryland, May 18, 1915.

Your way of doing business meets my approval, no fault to find, so far you have acted square and right. Hope all the trees will grow and do well.

TILGHMAN HILLEARY.

Rutland, Mass., Oct. 15th, 1915.

My folks have bought your stock and have always found it most satisfactory. The peach trees purchased from you four years ago came into bearing this year and others who have seen them are anxious to get some of the same stock.

GRACE L. SMITH.

South Framingham, Mass., Jany. 29, 1915.

Kindly send me your catalogue as I gave my last year's copy to a friend. Was much pleased with the stock I got of you last year.

GEO. A. DEARTH.

Orleans, Mass., March 4th, 1915.

I have in all about 90 Fruit Trees and have five nurseries represented in all. The trees I bought of you in 1914 are the finest looking and have made the largest growth of any of the other trees from the other nurseries. I bought of _____ five years ago 12 apple trees and out of the 12 I have dug out and burned up 6 trees and but one of the others has made any growth in the 5 years. I have set your trees where I took out _____'s and talk about growing, they have just jumped.

CHARLES H. FENN.

Lancaster, Pa., Jany. 5th, 1915.

The trees which I sent for in 1914 were what you said they would be. I got them in good time, about the 10th of April, 1914, they all started nicely. They were 42 in number and the Plum and Quince were specially fine.

JOHN B. KILHEFFER.

Stewartsville, N. J., April 29, 1915.

Received my order of trees yesterday and am well pleased with them.

DAVID W. OSWALD.

Hartford, Conn., Oct. 7, 1915.

Your Company was recommended to me by Mr. Hawkins and Mr. Smith, of this city.

W. S. BREWER.

Moosup, Conn., Feby. 14, 1915.

I received good trees from you last year, so thought would send another order this year and would like just as good trees this year as I had last year. I shall certainly recommend you as a good firm to send to, I think you are a good firm and very reliable.

GEO. E. HILL.

Leavittsburg, Ohio, Mch. 25, 1915.

Last spring I sent you an order and was so well pleased with all that you sent me that I want to order from you again this spring.

MRS. GEO. W. BURROWS.

Newcomerstown, Ohio, April 23, 1915.

I wish you could see the trees you sent me three years ago. Every one of them lived and they are growing finely.

J. P. SHEAVER.

Monongahela, Pa., March 30th, 1915.

The orchard of about 30 trees that I purchased from you last year did splendidly. Our season was dry and many lost quite a number of trees but I only lost one.

REV. W. F. MCKEE.

Lynn, Mass., Dec. 14th, 1914.

Trees I bought of you last year have grown well and are a fine lot, I didn't lose one of them. I was very much pleased with my last order from you and trust I will be the same with this.

S. WALTER SIMONDS.

Greenwood, Mass., May 1st, 1915.

Nursery stock received in excellent shape. It is the concensus of opinion here by everyone who has seen the stock that it is the finest ever seen in this vicinity. To put it mildly I am delighted.

J. F. WATERS.

Telford, Pa., Feby. 12, 1915.

Customers were well satisfied, they said they got the nicest trees they ever got; that they often paid one dollar apiece for such trees. You will notice some send duplicate orders.

CLAIR B. GODSHALL.

July 12th, 1915, Leominster, Mass.

Those McIntosh Apple Trees arrived in perfect shape and are doing fine.

F. LOVELACE.

Testimonials—continued

Hopewell Junction, N. Y., Nov. 19, 1915.

My trees were received in excellent condition last spring, 60 in number. I never had trees that grew and done so well, not one but what lived.

JERRY E. LENT.

Allentown, Pa., Sept. 28, 1915.

Enclosed find order for trees. I have been so well pleased with trees received some time ago that I want to try some more of them.

MRS. HY. D. HERSH.

Chester, N. Y., Aug. 2nd, 1915.

Your firm has been recommended to me as a good reliable place to get fruit trees.

RENO. L. HYATT.

Sanatoga, Pa., Sept. 27th, 1915.

Received your trees in fine condition and after receiving such nice trees from you I recommended you to Mr. Chas. Buckwalter, who will send you a large order in the near future. Hoping you will send him trees just as nice as mine were.

C. D. STETLER.

Sandy Point, Maine, Mch. 8, 1915.

All of the trees which were on the road so long last year grew finely, I didn't lose any. I am trying to educate my neighbors to order direct from the nursery instead of allowing themselves to be trimmed by agents. A part of this order I am enclosing belongs to one of my neighbors.

E. A. PARTRIDGE.

March 8th, 1915, Westford, Mass.

I sent order for trees last year and was well satisfied with them. I showed them to my neighbors and they thought they were good. If you send as good trees this time as you did last year I perhaps will send a bigger order next year.

WM. HUNT.

April 19th, 1915, Attleboro, Mass.

Received trees this morning, better looking trees than I expected to get for the money.

OTTO NEWHAUS.

Ottawa, Kansas, May 1st, 1915.

I have received the shipment of trees, etc., all in very good condition and wish to thank you for your promptness in filling the order also for the Rose Bush which you sent.

P. C. LINDQUIST.

May 5th, 1915, Rockland, Mass.

Trees received from you last year are doing fine. One tree has 42 blossoms. I am well pleased with the trees.

ALBERT HOBART.

Schenectady, N. Y., May 18, 1915.

Your package of strawberries arrived in fine condition.

MRS. H. CUMMINGS.

Mt. Kisco, N. Y., Nov. 4th, 1915.

My small order of trees received in good condition. The XXX trees and rose bush are exceptionally fine.

F. J. CARPENTER.

DaCosta, N. J., April 21, 1915.

Received trees today in good shape and wish to thank you for same. They are nice trees.

V. H. STEINEDER.

Gadsden, Ala., Nov. 12, 1915.

Received trees O. K. They are nice trees and I am well pleased with them and with my previous dealings with you. I consider your trees the most reasonable in price of any nursery I know of and shall certainly be glad to do business with you in the future.

O. H. ALFORD.

An Effective Evergreen Planting

Copy of Certificate of Inspection Accompanies Each Order

STATE OF NEW YORK, DEPARTMENT OF AGRICULTURE

Certificate of Inspection of Nursery Stock No. 604

This is to certify that the stock in the nursery of L. W. Hall Company, Inc., of Rochester, County of Monroe, State of New York, was duly examined in compliance with the provisions of Section 305 of the Agricultural Law, and it was found to be apparently free in all respects from any contagious or infectious plant disease or diseases, or the San Jose scale or other dangerously injurious insect pest or pests. This certificate expires September 1, 1916.

Dated Albany, N. Y., October 14, 1915.

CHAS. S. WILSON,
Commissioner of Agriculture.

Our nurseries have been inspected by the State Inspector for San Jose scale and other dangerous insects and diseases, in compliance with the laws of New York, and have been found free of such troubles. A certificate of the inspector will accompany every sale and shipment as required by the law. All shipments into States requiring it will be properly fumigated and certificate of fumigation attached.

Distances for Planting

Standard Apples	30 to 40 feet apart each way
Standard Pears and Strong Growing Cherries.....	20 " " "
Duke and Morello Cherries.....	18 " " "
Standard Plums, Peaches, Apricots and Nectarines.....	16 to 18 " " "
Dwarf Pears	10 to 12 " " "
Dwarf Apples	10 to 12 " " "
Quinces	10 to 12 " " "
Grapes	rows of 10 to 16 feet apart; 7 to 16 feet in rows
Currants and Gooseberries	4 feet apart
Raspberries and Blackberries	3 to 4 by 5 to 7 feet
Strawberries, for field culture.....	1 by 3 to 3½ feet
Strawberries, for garden culture.....	1 to 2 feet apart
Asparagus, for field culture.....	1 by 3 feet
Asparagus, for garden culture.....	1 by 1½ feet

Number of Trees on an Acre

40 feet apart each way.....	27	10 feet apart each way.....	435
30 " " "	50	8 " " "	680
25 " " "	70	6 " " "	1210
20 " " "	110	5 " " "	1745
18 " " "	135	4 " " "	2725
15 " " "	205	3 " " "	4840
12 " " "	300		

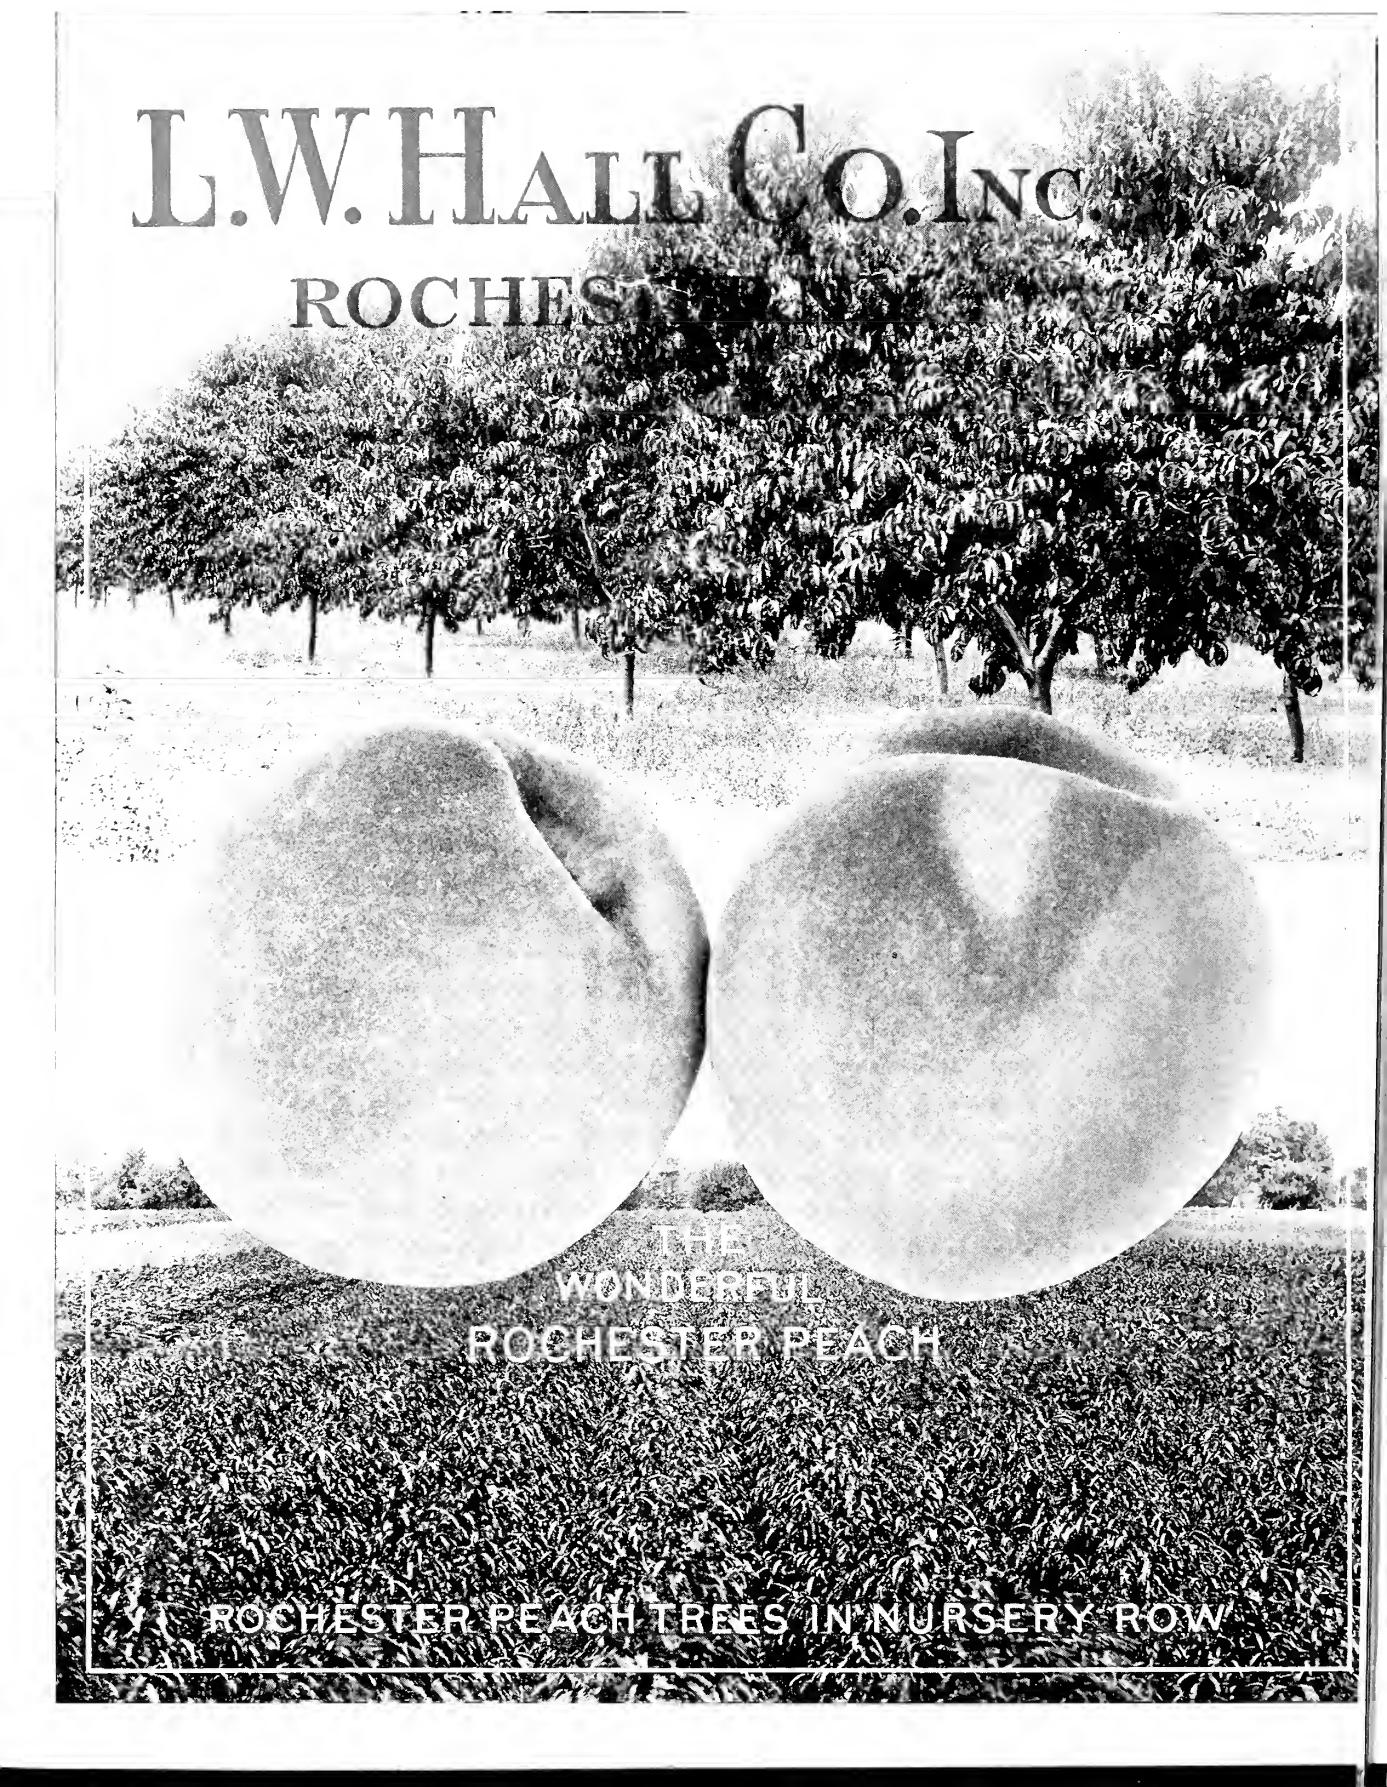

Rule.—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of square feet in an acre (43,560), will give the number of plants or trees to the acre.
